

§255 *The form of the instructions*

In 2023 no less than 93% of EU households had internet access (source: Eurostat²⁰⁵). Under these circumstances, and in light of the new Machinery Regulation's provisions on the format of the instructions, one can consider that respecting those provisions, including the obligation to provide the essential safety information in paper format in the case of non-professional use, also ensures compliance with the corresponding provisions of the Machinery Directive.

Instructions for use when they are provided in digital format

When the instructions for use are provided in digital format, the provisions of Article 10(7) of the new Machinery Regulation can ensure compliance.

Compliance with Article 10(7) of that Regulation is appropriate given that the Regulation sets out specific obligations on the manufacturers when they provide the instructions for use in digital format.

In addition, in case of machinery for non-professional use made physically available in Member States, it is recommended that the following statement is provided in the essential safety information or on the packaging or on the machinery itself: 'The purchaser has the right to request to obtain, free of charge, the instructions for use in paper format'.
