Precedents in Architecture Roger H. Clark, Michael Pause, 2015-08-24 *The Architecture of Roman Temples* John W. Stamper, 2005-02-16 This book examines the development of Roman temple architecture from its earliest history in the sixth century BC to the reigns of Hadrian and the Antonines in the second century AD John Stamper analyzes the temples formal qualities the public spaces in which they were located and most importantly the authority of precedent in their designs He also traces Rome s temple architecture as it evolved over time and how it accommodated changing political and religious

contexts as well as the affects of new stylistic influences **Constructing the Architect** Leonard R. Bachman,2019-01-22

Unlike books that concentrate on the monuments and other artefacts that architects produce *Constructing the Architect* focuses on architecture as a disciplinary and professional process an institution of society and a career of learning and mastery In doing so it offers a lens into the architecture of architecture Mapping architecture as a coherent whole Leonard Bachman shows that the field must be understood as four mutually reinforcing modes of inquiry design research strategy and education Within this framework he explains how institutions and actors hold differing perspectives on the critical discourse that advances architecture and identifies the various tensions and leverage points for change within the discipline Featuring over 100 illustrations to support understanding of this highly visual subject this is an essential introduction for any student seeking to understand what it means to be an architect and to enter the professional discourse *Architecture History,*

Theory and Preservation Arleen Pabón-Charneco,2020-11-29 *Architecture History Theory and Preservation* critically explores the historic development theoretical underpinnings and conservation practices of architecture Complete with 170 full color images this volume presents architectural and urban examples from Prehistory to the Middle Ages chronologically and thematically examining contextual issues that provide each period with distinctive expressions The special features structural systems materials and construction technologies are analyzed as well as how the international community deals with the task of interpreting and preserving certain historic properties This publication provides professors and students of architecture art history historic preservation and related fields with an integrated view of architecture using historical theoretical and conservation perspectives As an architect architectural historian and preservationist herself Dr Pab n Charneco weaves a field of relationships regarding each building creating a silent yet empowering bridge between past and present

Understanding Meaningful Environments Karina Moraes Zarzar,Ali Guney,2008 *Understanding Meaningful Environments Architectural Precedents and the Question of Identity in Creative Design* intends to put forward a discussion on the use of precedents and the production of innovative designs as well as to discuss the relationship between precedents and identity in a world undergoing a rapid process of globalization This publication provides insights into how the strategy of making use of design precedents as a source of knowledge rather than initiating a project from tabula rasa leads to efficient effective and or innovative results based in particular on the work of Le Corbusier and Santiago Calatrava In the sense that architects ideologies and intentions did not form a main position in this account one may say that it is not a value added approach However in this publication this other side of the use of precedents is explored i e recollection and intention because in addition to innovations the critical use of precedents seems to help in the production of buildings places that embody a critical notion of identity The goal of this study is to provide a reflection on the themes mentioned as well as to briefly discuss methods for precedent analysis *Building the Architect's Character* Kendra Schank Smith,Albert Smith,2017-12-22 An

understanding of architects character traits can offer important insights into how they design buildings These traits include

leadership skills necessary to coordinate a team honest and ethical behavior being well educated and possessing a life long love of learning flexibility resourcefulness and visionary and strategic thinking Characteristics such as these describe a successful person Architects also possess these traits but they have additional skills specifically valuable for the profession These will include the ability to question the use of digital media new materials processes and methods to convey meaning in architectural form Although not exhaustive a discussion of such subjects as defining imaging persuading and fabricating will reveal representational meaning useful for the development of an understanding of architects character Through the analogies and metaphors found in Greek myth the book describes the elusive hard to define characteristics of architects to engage the dilemmas of a changing architectural landscape Building the Architect s Character Explorations in Traits examines traditional and archetypal characteristics of the successful architect to ask if they remain relevant today

JACKET The Architecture of the Facade Randall Korman,2022-12-30 The Architecture of the Facade provides a comprehensive study of the facade as both a physical and cultural artifact highlighting its significance as a critical component of the civic realm and arguing for the restoration of the art of the facade as both a subject of study within academia and an aspiration within the profession at large As the principal surface of mediation contextualization and representation the facade carries the lion s share of responsibility for containing the internal environment and confronting the outer world And yet in recent decades the very question of what exactly a facade is has been raised by the dramatic changes in building technology advances of parametric design and the ubiquity of autonomous buildings The Architecture of the Facade addresses these and other related issues The book is organized into 12 chapters with each chapter focusing on a particular aspect of the phenomenon of the facade such as those of wall the frame transparency and the role of the facade in civic space Korman also discusses proportional systems the language of composition the role of precedent the importance of context and much more Over 350 photos and diagrams provide readers with a variety of examples of artful facades throughout history Online teaching resources that accompany this book include a course syllabus a glossary and a Pinterest tack board of facades This book will be of great interest to students in architecture studios as well as instructors and professional architects interested in facade design

The Michigan Architect and Engineer ,1924 **The Ten Most Influential Buildings in History** Simon Unwin,2016-07-07 Even the most inventive and revolutionary architects of today

owe debts to the past often to the distant past when architecture really was being invented for the first time Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history The Ten Most Influential Buildings in History Architecture s Archetypes identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings Archetypes have a timeless relevance In adopting this approach The Ten Most Influential Buildings in History is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two Architecture in the Digital Age Branko Kolarevic,2004-03 Architecture in the Digital Age addresses contemporary architectural practice in which digital technologies are radically changing how buildings are conceived designed and produced It discusses the digitally driven changes their origins and their effects by grounding them in actual practices already taking place while simultaneously speculating about their wider implications for the future The book offers a diverse set of ideas as to what is relevant today and what will be relevant tomorrow for emerging architectural practices of the digital age *Material Precedent* G. P. Borden,2010-03-22 A comprehensive richly illustrated catalog focusing on materials used in great twentieth century architecture Viewed primarily in technical terms pertaining to construction material has often been overlooked in the discourse on architectural design Yet it is material that breathes life into architecture by realizing concepts into meaningful physical forms Whether it is wood glass steel plastic or concrete material can be employed with unlimited flexibility and carries both visual and emotional characteristics through its expression The first book of its kind to focus on materiality from a design perspective Material Precedent is masterfully presented with an impressive collection of crisp line drawings along with historical material tectonic and typological analysis of twentieth century buildings providing readers with detailed instruction that traces the traditions and trends of material as the defining premise in the making of architecture This unrivaled text Is illustrated throughout with detailed line drawings Is perfect for use in a design studio or simply for understanding the role of materials in buildings for a designer of any level Includes a companion Web site By cataloging and comparing the concepts behind modern building science using architectural precedent Material Precedent examines structure form effect detail sustainability and performance through material application to provide a comprehensive analysis of the materiality of architecture *Rethinking Architectural Historiography* Dana Arnold,Elvan Altan Ergut,Belgin Turan Ozkaya,2006-09-27 Rather than subscribing to a single position this collection informs the reader about the current state of the discipline looking at changes across the broad field of methodological theoretical and geographical plurality Divided into three sections Rethinking Architectural Historiography begins by renegotiating foundational and contemporary boundaries of

architectural history in relation to other fields such as art history and archaeology It then goes on to critically engage with past and present histories disclosing assumptions biases and absences in architectural historiography It concludes by exploring the possibilities provided by new perspectives reframing the discipline in the light of new parameters and problematics This timely and illustrated title reflects upon the current changes in historiographical practice exploring potential openings that may contribute further transformation of the disciplines and theories on architectural historiography and addresses the current question of the disciplinary particularity of architectural history Architecture, Liberty and Civic Order Carroll William Westfall, 2016-03-09 This book brings to light central topics that are neglected in current histories and theories of architecture and urbanism These include the role of imitation in earlier centuries and its potential role in present practice the necessary relationship between architecture urbanism and the rural districts and their counterpart in the civil order that builds and uses what is built The narrative traces two models for the practice of architecture One follows the ancient model in which the architect renders his service to serve the interests of others it survives and is dominant in modernism The other first formulated in the fifteenth century by Leon Battista Alberti has the architect use his talent in coordination with others to contribute to the common good of a republican civil order that seeks to protect its own liberty and that of its citizens Palladio practiced this way and so did Thomas Jefferson when he founded a uniquely American architecture the counterpart to the nation's founding This narrative gives particular emphasis to the contrasting developments in architecture on the opposite sides of the English Channel The book presents the value for clients and architects today and in the future of drawing on history and tradition It stresses the importance indeed the urgency of restoring traditional practices so that we can build just beautiful and sustainable cities and rural districts that will once again assist citizens in living not only abundantly but also well as they pursue their happiness Assembling the Centre: Architecture for Indigenous Cultures Janet McGaw, Anoma Pieris, 2014-11-13 Metropolitan Indigenous Cultural Centres have become a focal point for making Indigenous histories and contemporary cultures public in settler colonial societies over the past three decades While there are extraordinary success stories there are equally stories that cause concern award winning architecturally designed Indigenous cultural centres that have been abandoned centres that serve the interests of tourists but fail to nourish the cultural interests of Indigenous stakeholders and places for vibrant community gathering that fail to garner the economic and political support to remain viable Indigenous cultural centres are rarely static They are places of emergence assembled and re-assembled along a range of vectors that usually lie beyond the gaze of architecture How might the traditional concerns of architecture site space form function materialities tectonics be reconfigured to express the complex and varied social identities of contemporary Indigenous peoples in colonised nations This book documents a range of Indigenous Cultural Centres across the globe and the processes that led to their development It explores the possibilities for the social and political project of the Cultural Centre that architecture both inhibits and affords Whose idea of architecture

counts when designing Indigenous Cultural Centres How does architectural history and contemporary practice territorialise spaces of Indigenous occupation What is architecture for Indigenous cultures and how is it recognised This ambitious and provocative study pursues a new architecture for colonised Indigenous cultures that takes the politics of recognition to its heart It advocates an ethics of mutual engagement as a crucial condition for architectural projects that design across cultural difference The book s structure method and arguments are dialogically assembled around narratives told by Indigenous people of their pursuit of public recognition spatial justice and architectural presence in settler dominated societies Possibilities for decolonising architecture emerge through these accounts
