Excerpt from *Principles of Political Economy With Some of Their Applications to Social Philosophy* With Special Intro by Arthur T. Hadley. How strong and at the same time how subtle was the influence of those current conceptions can perhaps best be seen in the works of men who like Carlyle or Kingsley at tempted to take a position hostile to Mill. Underlying the thought of these writers there is the sound and healthful idea that material wealth ought not to be elevated to the position of an independent entity, dis severed from the happiness of those who are to enjoy it. But it would seem that neither of them really formulated this protest in valid shape. Instead of rejecting Mill's conceptions they inveighed against his conclusions. Like him they took their subjects ready made; like him they made their own predicates but being possessed of less than his power in logic and patience in study their predicates were less correct than his. And what is seen in Kingsley or Carlyle is seen also in Lassalle and Marx. About the Publisher: Forgotten Books publishes hundreds of thousands

Money experiments in this country of International Values of the Future of the Laboring Classes in which the chapter was entirely rewritten and of Protection The treatment of Land Tenures has not been entirely omitted but it does not appear as a separate subject because it has at present less value as an elementary study for American students The chapters on Land Tenures the English currency discussion and much of Book V on the Influence of Government have been simply omitted In one case I have changed the order of the chapters by inserting Chap XV of Book III treating of a standard of value under the chapter treating of money and its functions In other respects the same order has been followed as in the original work To interest the reader in home problems twenty four charts have been scattered throughout the volume which bear upon our own conditions with the expectation also that the different methods of graphic representation here presented would lead students to apply them to other questions They are mainly such as I have employed in my class room The use and preparation of such charts ought to be encouraged The earlier pages of the volume have been given up to a Sketch of the History of Political Economy which aims to give the story of how we have arrived at our present knowledge of economic laws The student who has completed Mill will then have a very considerable bibliography of the various schools and writers from which to select further reading and to select this reading so that it may not fall wholly within the range of one class of writers But for the time that Mill is being first studied I have added a list of the most important books for consultation I have also collected in Appendix I some brief bibliographies on the Tariff on Bimetallism and on American Shipping which may be of use to those who may not have the means of inquiring for authorities and in Appendix II a number of questions and problems for the teacher s use
