PSYCHOLOGY OF LEARNING AND DEVELOPMENT Dr. Deepa Rani,2023-10-06 Teaching is an exciting and rewarding activity but like other professions it is demanding It requires that its practitioners clearly understand what should be done to bring about the most desirable learning in the pupil and be highly proficient in the skills necessary to carry out these tasks Teaching is not the simple matter of profession one s message It is complicated communication problem Using different teaching methods techniques and devices we can solve the communication problem

Teaching methods are means by which the teachers attempt to bring about the desired learning. A professionally trained teacher can use different methods of teaching successfully. It is really a very difficult task and only a professionally qualified teacher can do this. We cannot expect all this from a teacher professionally unqualified. To provide professional education for teachers, colleges of education have been established almost all over the world. In Pakistan, teacher education programs in consonance with various levels of education, i.e. B.Ed and M.Ed have been introduced at certain colleges and universities. All the teachers' training institutions are not only imparting theoretical but also practical knowledge and skill in teaching different subjects to prospective teachers. At the end of the session, teaching practice is carried out for practical application of theoretical understanding about different teaching methods. It is generally of one month's duration. Whereas teaching is the process by which a person helps other people to learn. It is one of our most important activities. Teaching helps people to gain the knowledge and attitudes they need to be responsible citizens, earn a living and lead a peaceful life. It also provides a chief means of passing knowledge to the next generation. Efforts to define teaching have centered on explorations of various facets of the concept of teaching rather than on the formulation of explicit definitions.

Literacy and Learning in the Content

Areas Sharon Kane, 2017-07-05. The 3rd Edition of *Literacy Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping, webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content communities and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
