They are also well known for their basking habits which involve perching on rocks or logs to get some much needed vitamin D. Aquatic vegetation, insects, small fish and other aquatic invertebrates are all part of these turtles diversified diet. Their capacity to thrive in a variety of water conditions is a major factor in their spread beyond their natural habitat. Due to their high demand in the pet trade, potential owners of Red Eared Sliders should be well versed in their specialized needs such as those related to tank size, water quality, temperature and diet. Taking turtles from the wild can be detrimental to turtle populations and the habitats in which they live, so it is important to make sure the turtles you own were born in captivity or were lawfully obtained.
