The Market System, Structural Change, and Efficient Economies Bodo B. Gemper, This volume's aim is to promote thought in readers interested in what kind of economic policies market systems welfare systems and socialist systems should each pursue under the pressures of accelerating change Should there be more government or less government This is the central question addressed by this internationally drawn group of experts The book features major case studies on the People's Republic of China Canada Ghana Great Britain South Africa Taiwan and West Germany Contributors include Richard L Brinkman from the United States James C W Ahiakpor and Tillo E Kuhn from Canada Dieter Loesch and Herbert Schmidt from Germany and Geert L deWet from South Africa For technical economists interested in world trade business people concerned with expanding markets and policy analysts concerned about how technology culture and politics drive economic systems this book is essential reading As the editor points out indicative targeting as the latest weapon in the arsenal of economic science makes it possible to systematically discover signals that could become points of reference landmarks for the way into the future The approach taken by the authors enables us to trace future trends by extrapolating current data onto new territory It will help the policy maker identify desirable trends and ideas and at the same time provides some early warning signals about high risk trends and patterns Bodo B Gemper is professor of economics at the University of Siegen in Germany He previously edited a Transaction volume *Structural Dynamics of Industrial Policy* and in German *Protectionism in the World Economy*

Economic Management and Transition Towards a Market Economy Anthony T.H. Chin, 1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they

provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies

Social Responsibility Oliver F. Williams, 2013-11-26 Over the last 30 years corporate social responsibility CSR has become a household term reflecting a combination of factors that we have come to associate with that most catch all of terms globalization including the widespread popular concern with such social issues as the environment and international human rights Corporate Social Responsibility examines the history of the idea of business ethics which goes back at least to ancient Mesopotamia before exploring the state of CSR today This book argues that a wide ranging understanding of the purpose of business is necessary to create value for a community of stakeholders which in turn can generate a sustainable future The book suggests that corporations still have a long way to go but remains optimistic The book s sanguine interpretation of the current state of corporate affairs and a recommended way forward results not only from the authors analysis but also his direct experience This book presents the case that we are in the midst of a major paradigm shift in our understanding of the

purpose of business and that this new understanding holds much promise for business being a significant force for a more just and peaceful world This work provides a concise overview of CSR and an important examination of the present and future work of the UN Global Compact and will be of interest to students of international organizations international business and corporate social responsibility

Myth of Liberal Ascendancy G. Williams Domhoff, 2015-11-17 Based on new archival research G Williams Domhoff challenges popular conceptions of the 1930 s New Deal Arguing instead that this period was one of increasing corporate dominance in government affairs affecting the fate of American workers up to the present day While FDR s New Deal brought sweeping legislation the tide turned quickly after 1938 From that year onward nearly every major new economic law passed by Congress showed the mark of corporate dominance Domhoff accessibly portrays documents of the Committee s vital influence in the halls of government supported by his interviews with several of its key employees and trustees Domhoff concludes that in terms of economic influence liberalism was on a long steady decline despite two decades of post war growing equality and that ironically it was the successes of the civil rights feminist environmental and gay lesbian movements not a new corporate mobilisation that led to the final defeat of the liberal labour alliance after 1968
