*Improving Maternity Services* Denis Walsh, Sheila Kitzinger, Norman Ellis, 2017-11-22 This title includes Foreword by Sheila Kitzinger Writer Researcher Activist and Honorary Professor Wolfson School of Health Sciences Thames Valley University Birth centres are suitable for every woman whose birth is straightforward which accounts for around 75 per cent of all women This inspirational guide shows

how small scale maternity provision has a profound clinical and organisational advantage over large scale hospital provision including saving of time and money by reducing intervention rates It presents the thoughts and feelings of midwives and patients and how both enjoy the humane and compassionate care of the birth centre ethos The book is invaluable for midwives obstetricians doulas maternity care assistants and maternity service planners and managers It also provides enlightening information for general practitioners and other health and social care professionals maternity service users groups and academics with an interest in midwifery and health services What birth centres do best is simply providing humane childbirth care There are no high tech gadgetry doctors or dramatic stories of childbirth rescues that make it into the media Yet miracles happen inside their walls every day as women have their babies after normal labours and births Until now there have been very few books detailing what happens in birth centres so that women and childbirth professionals can be introduced to an alternative beyond the large hospital model This book provides a window in on the birth centre model and there are some exciting things to find there about childbirth care in the 21st century Denis Walsh in the Preface Denis Walsh has one of the most incisive analytical and brilliant minds in nursing and midwifery research today He demonstrates the difference between a quality environment for birth where a woman can create her own nest and a technocratic bureaucratically controlled highly medicalised and risk oriented birth culture dominated by the clock which is most women s experience today Sheila Kitzinger in the Foreword

*Evidence-based Care for Normal Labour and Birth* Denis Walsh, 2007-04-19 Evidence based care is a well established principle in contemporary healthcare and a world wide health care movement However despite the emphasis on promoting evidence based or effective care without the unnecessary use of technologies and drugs intervention rates in childbirth are rising rapidly Evidence based Care for Normal Labour and Birth brings to light much of the evidence around what works best for normal birth which has until now remained largely hidden and ignored by maternity care professionals Beginning with the decision about where to have a baby through all the phases of labour to the immediate post birth period it systematically details research and other evidence sources that endorse a low intervention approach The book highlights where the evidence is compelling discusses its application where women question its relevance to them and where the practitioner s expertise leads them to challenge it gives background and context before discussing the research to date includes questions for reflection and practice recommendations generated from the evidence Using research data Evidence based Care for Normal Labour and Birth critiques institutionalised scientifically managed birth and endorses a more humane midwifery led model Packed with up to date and relevant information this controversial book will help all students practising midwives and doulas keep abreast of the evidence surrounding normal birth and ensure their practice takes full advantage of it

*Inappropriate Bodies Art, Design and Maternity* Buller Rachel Epp, 2019-09-01 This edited collection examines conflicting assumptions expectations and perceptions of maternity in artistic cultural and institutional contexts Over the past two decades the maternal body has gained currency in popular culture and the

contemporary art world with many books and exhibitions foregrounding artists' experiences and art historical explorations of maternity that previously were marginalized or dismissed. In too many instances, however, the maternal potential of female bodies, whether realized or not, still causes them to be stigmatized, censored, or otherwise treated as inappropriate. Cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations, and another set of prejudices against those who do not. Support for mothers in the paid workforce remains woefully inadequate, yet in many cultural contexts, social norms continue to ask what is wrong with women who do not have children. In these essays and conversations, artists and writers discuss how maternal expectations shape both creative work and designed environments and highlight alternative ways of existing in relation to those expectations.

Contains precious insights into what made David Graeber the most innovative social thinker of our time and why the legacy of his ideas will inspire projects of emancipation for generations. David Wengrow, Professor, University College London, co-author with David Graeber of *The Dawn of Everything*. A must-read for anyone who believes in the power of academia as activism. Sophie Chao, University of Sydney. David Graeber (1961–2020) was an American anthropologist and anarchist activist who left us with new ways to understand humankind. This collection of new writing brings together his insights into one book, showing how deeply his work continues to influence us today. Graeber's writing resonates with scholars and activists looking to shake things up. The impact of his work is broad in scope, from birth to banking, and he picks open social hierarchy and political power to expose what really makes human society tick. In today's neoliberal world, we can turn to his legacy to provide a way for us to understand what went wrong and how to fix it. This collection of writings is both an introduction to his life and works, a guide to his key ideas, and an inspiring example of how people are continuing to use his work today. Holly High is an Associate Professor at Deakin University, Australia. She has written two books, *Fields of Desire* and *Projectland*. Joshua O. Reno is a Professor at Binghamton University, US. A socio-cultural anthropologist, he is the author of *Waste Away*, *Military Waste*, and co-author of *Imagining the Heartland*.

Oh Baby

Kathy Fray, 2016-02-29 Much recommended by new mothers this is the only book you'll need for the best baby advice. Now completely revised and updated. Refreshingly honest, openly frank and candidly blunt, this book has been written by a mother who is also an experienced midwife for other mothers. It oozes warm fuzzies, exudes realism in every paragraph and is refreshing in its guiltless honesty. Modern first-time mothers are often alone, devoid of once traditional motherhood knowledge and practical support. Often previously self-confident women find themselves isolated, fumbling over everyday mothering tasks, enduring sleep deprivation, feeling desperately despondent and aching and leaking everywhere. This book provides supportive, caring advice, one mum to another, while at the same time serving as an encyclopaedic medical reference regarding the mother and baby. Checked thoroughly by medical professionals, this book is a unique blend, like having access to a kind and gentle GP as well as to all the gems of wisdom of years of mothers' coffee groups. This title clearly and compassionately explains the ups as well as the downs, which are perfectly normal aspects of giving birth and mothering in today's society.
