The Dynamics of Law and Morality Wibren van der Burg, 2016-03-23 This book investigates the dynamic intertwinement of law and morality with a focus on new and developing fields of law Taking as its starting point the debates and mutual misunderstandings between proponents of different philosophical traditions it argues that this theoretical pluralism is better explained once law is accepted as an essentially ambiguous concept Continuing on the book develops a robust theory of law that increases our grasp on global legal pluralism and the dynamics of law This theory of legal interactionism inspired by the work of Lon Fuller and Philip Selznick also helps us to understand apparent anomalies of modern law such as international law the law of the European Convention on Human Rights and horizontal interactive legislation In an ecumenical approach legal interactionism does justice to the valuable core of truth in natural law and legal positivism Shedding new light on familiar debates between authors such as Fuller Hart and Dworkin this book is of value to academics and students interested in legal theory jurisprudence legal sociology and moral philosophy

Legitimacy and Legality in International Law Jutta Brunnée, Stephen J. Toope, 2010-08-05 It has never been more important to understand how international law enables and constrains international politics By drawing together the legal theory of Lon Fuller and the insights of constructivist international relations scholars this book articulates a pragmatic view of how international obligation is created and maintained First legal norms can only arise in the context of social norms based on shared understandings Second internal features of law or criteria of legality are crucial to law s ability to promote adherence to inspire fidelity Third legal norms are built maintained or destroyed through a continuing practice of legality Through case studies of the climate change regime the anti torture norm and the prohibition on the use of force it is shown that these three elements produce a distinctive legal legitimacy and a sense of commitment among those to whom law is addressed

comparative constitutional book that Dicey began but did not finish prior to his death in 1922 The lectures were a pioneering venture into comparative constitutionalism and reveal an approach to legal education broader than Dicey is widely understood to have taken Topics discussed include English French American and Prussian constitutionalism the separation of powers representative government and federalism The volume begins with an editorial introduction examining the implications of these comparative lectures and Dicey's early foray into comparative constitutionalism for his general constitutional thought and the kinds of response it has elicited

Judicial Review and the Constitution Christopher Forsyth, 2000-05-01 This collection of essays presents opposing sides of the debate over the foundations of judicial review In this work however the discussion of whether the ultra vires doctrine is best characterised as a central principle of administrative law or as a harmless justificatory fiction is located in the highly topical and political context of constitutional change The thorough jurisprudential analysis of the relative merits of models of legislative intention and judicial creativity provides a sound base for consideration of the constitutional problems arising out of legislative devolution and the Human Rights Act 1998 As the historical orthodoxy is challenged by growing institutional independence leading figures in the field offer competing perspectives on the future of judicial review Confucius was wrong to say that it is a curse to live in interesting times We are witnessing the development of a constitutional philosophy which recognises fundamental values and gives them effect in the mediation of law to the people Sir John Laws Contributors Nick Bamforth Paul Craig David Dyzenhaus Mark Elliott David Feldman Christopher Forsyth Brigid Hadfield Jeffrey Jowell QC Sir John Laws Dawn Oliver Sir Stephen Sedley Mark Walters With short responses by TRS Allan Stephen Bailey Robert Carnworth Martin Loughlin Michael Taggart Sir William Wade

Tax Justice and Tax Law Dominic de Cogan, Peter Harris, 2020-11-12 Most people would agree that tax systems ought to be just and perhaps a great deal more just than they are at present What is more difficult is to agree on what tax justice is This book considers a range of different approaches to and ideas about the nature of tax justice and covers areas such as imbalances in international tax arrangements that deprive developing countries of revenues from natural resources and allow wealthy taxpayers to use tax havens protests against governments and large business attempts to influence policy through more technical means such as the OECD's Base Erosion and Profits Shifting project interpersonal matters such as the ways in which tax systems disadvantage women and minorities

the application of wider philosophical or economic theories to tax systems The purpose of the book is not to iron out these underlying differences into a grand theory but rather to gain a more precise understanding of how and why we disagree about tax justice In doing so the editors are assisted by a stellar cast of contributors from four continents with a wide variety of views and experiences but a common interest in this central question of how to agree and disagree about tax justice This is of course not only an intellectual exercise but also a necessary precursor to achieving real world change
