**Photo-texts** Andy Stafford,2010-01-01 What do photographs want Do they need any accompaniment in today s image saturated society Can writing inflect photography or vice versa in such a way that neither medium takes precedence Or are they in constant inexorable battle with each other Taking nine case studies from the 1990s French speaking world from France North Africa and the Caribbean this book attempts to define the interaction between non fictional written text caption essay fragment poem and photographic image Having considered three categories of intermediality between text and photography the collaborative the self collaborative and the retrospective the book concludes that the dimensions of their interaction are not simple and two fold visuality versus alongside textuality but threefold and therefore complex Thus the photo text as defined here is concerned as much with orality the demotic the popular the vernacular as it is with visual and written culture That text image collaborations give space to the spoken spectral traces of human discourse suggests that the key element of the photo text is its radical provisionality *American Photo* ,2002-05 **Clinical Ocular Photography**
