Reeds Vol 7: Advanced Electrotechnology Edmund G.R. Kraal, 2006-01-01 A companion to Volume 6 Basic Electrotechnology for Engineers this book covers more aspects of the theory of Electrotechnology The syllabus is close to that of Electrical Engineering for Marine Engineer Cadets Phase 3 of the Alternative Training Scheme and covers more fully the requirements of the DoT syllabus for Class 1 and Class 2 Marine Engineers Students studying for the Extra First Class Engineers Certificate will also find it of value It anticipates future extensions of these syllabuses and deals with brushless AC generators excitation systems for marine alternators and semiconductor theory relating to the diode transistor and the thyristor Numerous fully worked problems are included in the text as well as test examples and typical examination questions with solutions

Reeds Vol 6: Basic Electrotechnol Edmund G.R. Kraal, Stanley Buyers, 2004-04-30 This sixth volume of

Reed's Marine Engineering Series is based principally upon the Electrotechnology syllabuses for Class 1 and Class 2 Engineers. It is also suitable for Marine Engineering cadets studying the Electrical Engineering Principles unit of the BTEC programme. The book follows the same pattern as the other volumes in this series which has proved so successful: i.e. emphasis on basic principles, extensive illustrations, worked examples included in the text, practice examples at the end of each chapter and finally selections of Class 1 and Class 2 exam questions. Fully worked step by step solutions to every problem are provided which will prove especially helpful to Engineers studying at sea.

Reeds Vol 4: Naval Architecture for Marine Engineers Richard Pemberton, E A Stokoe, 2018-10-18 This textbook covers the theoretical fundamental aspects of naval architecture for students preparing for the Class 2 and Class 1 Marine Engineer Officer exams. It introduces the basic foundation themes within naval architecture: hydrostatics, stability, resistance and powering, using worked examples to show how solutions should be presented for an exam. The topics are ordered in a manner of a typical taught module to aid the use of the book by lecturers as a complement to a course. Importantly, this updated edition contains updated text and figures in line with modern practice, including an update of many of the figures to three dimensional diagrams and a new section on computer software for naval architecture. The book also includes sample examination questions with worked examples and answers to aid students in their learning.

Reeds Vol 13: Ship Stability, Powering and Resistance Jonathan Ridley, Christopher Patterson, 2021-08-05 This indispensable guide to ship stability covers essential topics such as flotation and buoyancy, small angle, large angle and longitudinal stability, water density effects, bilging, ship resistance and advanced hydrostatics. Each chapter has a comprehensive list of aims and objectives at the start of the topic followed by a checklist at the end of the topic for students to ensure that they have developed all the relevant skills before moving onto the next topic area. The book features over 170 worked examples with fully explained solutions, enabling students to work through the examples to build up their knowledge and develop the necessary key skills. The worked examples, which range in difficulty from very simple one step solutions to SQA standard exam questions and above, are predominantly based on a hypothetical ship. The reader is supplied with extracts from a typical data book for the ship which replicates those found on actual ships, enabling the reader to develop and practise real life skills. This edition has been fully updated in line with the recently changed rules and regulations around ship stability and the updated national exam syllabus. Updates include corrections and clarifications to worked examples, new text on damaged stability and probabilistic stability, extra content on hydrostatic forces and centres of pressure and extra content on stability information for small craft.
