## **Reengineering Revolution:**

**The Reengineering Revolution** Michael Hammer, Steven A. Stanton, 1995 In *Reengineering the Corporation* Michael Hammer introduced to reengineering success. He and his colleague Steven Stanton offer practical guidance on the principles of reengineering. The book contains case studies and examples and takes the mystery out of reengineering. The Reengineering Revolution Michael Hammer, Steven A. Stanton, 1996 From the co-author of the international bestseller *Reengineering the Corporation*, this is the essential guide for everyone who wants to join the reengineering revolution.

Reengineering the Corporation Michael Hammer, James Champy, 2009-10-13 The most successful business book of the last decade, *Reengineering the Corporation* is the pioneering work on the most important topic in business today: achieving dramatic performance improvements. Michael Hammer and James Champy have updated and revised their milestone work for the New Economy; they helped to create promising ways to help corporations save hundreds of millions of dollars, more raise their customer satisfaction still higher, and grow ever more nimble in the years to come. The Reengineering Revolution David Knights, Hugh Willmott, 2000-01-26 The *Reengineering Revolution* reviews the significance of the Business Process Reengineering trend for management practice since the early 1990s. Combining empirical and theoretical perspectives, David Knights and Hugh Willmott show how both term and practice shaped the recent widely adopted policies of downsizing, restructuring, and emphasis on process rather than task. Well-known contributors analyze the impact of Business Process Reengineering in a number of settings: supermarkets and the food chain, the public sector, banks. The theoretical history of Business Process Reengineering is also detailed in relation to ideas about bureaucracy, hierarchy, transformation, and design. **The Reengineering Revolution** Michael Hammer, Steven A. Beyond Re-Engineering Michael Hammer, 1998-03-02 Beyond Reengineering is not about reengineering it is about the shape of tomorrow\_s business To succeed or even to survive in today\_s global economy companies must refocus and reorganise themselves around their core processes the end to end sequences of tasks that create customer value The process centred organisation signifies a

complete break with the past and as such marks the end of the Industrial Revolution and of the organisations that were designed for it. It means the end of narrow jobs, supervisory management, traditional career paths and feudal cultures and ushers in a new era of flexibility. For a world of process centred organisation everything must be rethought: the kinds of work that people do, the jobs they hold, the skills they need, the careers they follow, the roles managers play and the principles of strategy that companies follow. Michael Hammer illuminates this new world in which all the familiar rules have been broken and helps people to prepare for a radically different business future. *Re-engineering of Products and Processes* Federico Rotini, Yuri Borgia, Gaetano Cascini, 2012-04-23. Whilst previous methods for business process reengineering have focused on time and cost reduction policies to preserve competitive services and products, *Re-engineering of Products and Processes: How to Achieve Global Success in the Changing Marketplace* presents a new approach which aims to include aspects that impact the customer perceived value. This method supports business reengineering initiatives by identifying process bottlenecks as well as new products and services viable to overcome market competition. This original approach is described step by step, explaining the theory through examples of performable tasks and the selection of relevant tools according to the nature of the problem. Supported by illustrations, tables and diagrams, *Re-engineering of Products and Processes: How to Achieve Global Success in the Changing Marketplace* clearly explains a method which is then applied to several case studies across different industrial sectors. *Re-engineering of Products and Processes: How to Achieve Global Success in the Changing Marketplace* provides a scientific reference for researchers and PhD students working in several fields of the Industrial Engineering: mechanical, electric, electronic sectors and more in general all the industrial areas where there are needs to design innovative products. The step by step description on how to employ the proposed method and its application to practical examples make the book a key resource for industry consultants and managers who look to increase the value of their products and services for new and existing customers. **Business Process Reengineering** Graham
