

## OCCUPATIONS

Occupations are central to a client's (person's, group's, or population's) identity and sense of competence and have particular meaning and value to that client. Occupation is used to mean all the things people want, need, or have to do, whether of physical, mental, social, sexual, political, or spiritual nature and is inclusive of sleep and rest.

## CLIENT FACTORS

Client factors are specific capacities, characteristics, or beliefs that reside within the person and that influence performance in occupations.

## PERFORMANCE SKILLS

Performance skills are goal-directed actions that are observable as small units of engagement in daily life occupations. They are learned and developed over time and are situated in specific contexts and environments.

# OCCUPATIONAL THERAPY

## ENVIRONMENT

Environment refers to the external physical and social conditions that surround the client and in which the client's daily life occupations occur. The physical environment refers to the natural and built surroundings in which daily life occupations occur. The social environment consists of the presence of, relationships with, and expectations of persons, groups, and populations with whom clients have contact.

## CONTEXT

The term context refers to elements within and surrounding a client that are often less tangible than physical and social environments but nonetheless exert a strong influence on performance. Contexts are cultural, personal, temporal, and virtual.

## PERFORMANCE PATTERNS

Performance patterns are the habits, routines, roles, and rituals used in the process of engaging in occupations or activities that can support or hinder occupational performance.
