Transverse Disciplines Simone Pfleger, Carrie Smith, 2022-08-31 For at least a decade university foreign language programs have been in decline throughout the English speaking world As programs close or are merged into large multi language departments disciplines such as German studies find themselves struggling to survive Transverse Disciplines offers an overview of the current research on the humanities and the academy at large and proposes creative and courageous ideas for the university of the future Using German studies as a case study the book examines localized academic work in Australia Canada the United Kingdom and the United States in order to model new ideas for invigorated thinking beyond disciplinary specificity university communities and entrenched academic practices In essays that are theoretical speculative experimental

and deeply personal contributors suggest that German studies might do better to stop trying to protect existing national and disciplinary arrangements. Instead the discipline should embrace feminist, queer, anti-racist and decolonial academic practices and commitments including community based work, research creation and scholar activism. Interrogating the position of researchers, teachers and administrators inside and outside academia, *Transverse Disciplines* takes stock of the increasingly tenuous position of the humanities and stakes a claim for the importance of imagining new disciplinary futures within the often restrictive and harmful structures of the academy.
