of the figure of the titan who yearns for self mastery in the face of death and who denounces modernity's tendency to reduce the individual to the lockstep of need and gratification. But what of those few who rejected the impulses of the titan: those militant desires to exert supremacy over all? The story recounted in *Against the Titans: The Theology of the Martyrdom of Alfred Delp* examines one martyr's rejection of the titan's perversion of heroism and sacrifice. The life of Delp, a Jesuit priest, embodied a Christian theology of martyrdom articulated over against a virile fundamentalism that rejected divine sovereignty. As Peter Nguyen S.J. shows, Delp opposed Ernst Jünger's active nihilism by revealing a more authentic and no less demanding existence: one that came not from acquiring self mastery but rather from an emptying out of self, an *indiferencia*, an unselfing through a radical dependence upon God. **The Second World Wars** Victor Davis Hanson, 2017-10-17. A breathtakingly magisterial account of World War II by America's preeminent military historian. *Wall Street Journal*. World War II was the most lethal conflict in human history. Never before had a war been fought on so many diverse landscapes and in so many different ways: from rocket attacks in London to jungle fighting in Burma to armor strikes in Libya. *The Second World Wars* examines how combat unfolded in the air, at sea, and on land to show how distinct conflicts among disparate combatants coalesced into one interconnected global war. Drawing on 3,000 years of military history, bestselling author Victor Davis Hanson argues that despite its novel industrial barbarity, neither the war's origins nor its geography were unusual. Nor was its ultimate outcome surprising. The Axis powers were well prepared to win limited border conflicts but once they blundered into global war, they had no hope of victory. An authoritative new history of astonishing breadth, *The Second World Wars* offers a stunning reinterpretation of history's deadliest conflict. ***Chiang Kai-shek's Critical Years, 1935-50*** Emily M. Hill, 2025-04-01. From 1935 to 1950, Chiang Kai-shek steered China's development as a nation and shaped global history. Yet he remains an enigmatic figure, remembered primarily for losing a decisive civil war. A reinterpretation is overdue. Based on Chiang's own writing, particularly his diary, *Chiang Kai-shek's Critical Years* sheds new light on his call for mobilization against Japan in 1937 and his relations with US representatives during the war, his efforts first to accommodate and then to defeat the Chinese Communist Party, and his ability to hold on to the presidency of the Republic of China after 1949 despite disastrous military failure. This examination of Chiang's daily planning and reflection on events reveals astute improvisation that ensured political survival despite setbacks and weaknesses. The sharpened sense of Chiang's agency that emerges from this important book provides an invaluable foundation for further analysis of the military and political institutional structures he helped build. ***The Second World War in the Twenty-First-Century Museum*** Stephan Jaeger, 2020-02-24. The Second World War is omnipresent in contemporary memory debates. As the war fades from living memory, this study is the first to systematically analyze how Second World War museums allow prototypical visitors to comprehend and experience the past. It analyzes twelve permanent exhibitions in Europe and North America, including the Bundeswehr Military History Museum in Dresden, the Museum of the Second World War in Gdańsk, the House of European History in Brussels, the Imperial

War Museums in London and Manchester and the National WWII Museum in New Orleans in order to show how museums reflect and shape cultural memory as well as their cognitive ethical emotional and aesthetic potential and effects This includes a discussion of representations of events such as the Holocaust and air warfare In relation to narrative memory and experience the study develops the concept of experientiality on a sliding scale between mimetic and structural forms which provides a new textual spatial method for reading exhibitions and understanding the experiences of historical individuals and collectives It is supplemented by concepts like transnational memory empathy and encouraging critical thinking through difficult knowledge

Germany, Hitler, and World War II Gerhard L. Weinberg, 1995-02-24 Reflecting on the greatest war in human history one cannot help but think about the terrible conflict as a whole its leaders its peoples and the puzzles still open about its conduct Leaders on both sides realised that at stake from the very beginning was a complete restructuring of the world order More than a conflict of imperial aggression World War II was about who would live and command the globe s resources and which peoples would disappear entirely because they were believed to be inferior or undesirable by the victor This collection of special studies in twentieth century German and world history illuminates the nature of the Nazi system and its impact on Germany and the world Bringing together essays now widely scattered and several never previously published in English this volume examines the Holocaust the connections between the European and Pacific theatres of war as well as the effects leaders and research problems of World War II By examining the effects of World War II its leaders its problems and the Holocaust this volume provides an illuminating study of the nature of the Nazi system and its impact on Germany and the world

The Archive Thief Lisa Moses Leff, 2015 In the aftermath of the Holocaust Jewish historian Zosa Szajkowski gathered up tens of thousands of documents from Nazi buildings in Berlin and later public archives and private synagogues in France and moved them all illicitly to New York In *The Archive Thief* Lisa Moses Leff reconstructs Szajkowski s story in all its ambiguity
