Weber,2021-05-26 China has become deeply integrated into the world economy Yet gradual marketization has facilitated the country s rise without leading to its wholesale assimilation to global neoliberalism This book uncovers the fierce contest about economic

reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question. China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research including interviews with key Chinese and international participants and World Bank officials, as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.

**China's Reform in the Next Ten Years** Yilin Press, 2016-05-24 A collection of essays by leading Chinese political economists about the economic challenges facing China today and the reforms to everything from financial institutions to urban housing policy that will be necessary to prepare for the next ten years.

**China's Transition from Socialism?** Dorothy J. Solinger, 2016-06-16 The essays in this volume address the industrial, commercial, urban, and regional reforms of China's planned economy during the 1980s. The emphasis is on the dominating institutional and bureaucratic presence of the state even as it sought to loosen the pre-1979 vertically structured centralized command system and to introduce some market principles to stimulate economic activity. The essays fall into four categories: theoretical and policy discussions and debates at the central leadership level; reform of the urban economy and of inter-regional relations; industrial and commercial reforms; and the rise and position of the new entrepreneurial class. Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan, and therefore this is the only study that uses local data on actual operations of reforms from a Chinese city. The other sources are the Chinese press and Chinese official and scholarly journals. In each of the categories, there are pieces from different points in the chronological process of reform. This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s. The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme.

**Price Reform in China, 1979-86** Jiann-Jong Guo, 1992-06-18 This text investigates the characteristics, achievements, and difficulties in reforming the producer and procurement pricing system in China. It attempts to show how the price system moved from a high degree of control in a rigid command economy to partial control in a more decentralized economy.

*China and Globalization* Doug Guthrie, 2012 An accessible introductory text on contemporary China, this book covers the social, economic, and political factors responsible for China's revolutionary changes and interweaves this structural analysis with a consideration of social changes at the micro

and macro levels      **Chinese Economic History Since 1949** Michael Dillon, 2017-06-01 China's economic development has become a matter of world wide interest since the boom that began in the 1980s Key Papers in Chinese Economic History since 1949 offers a selection of outstanding articles that trace the origins of the modern Chinese economy Topics covered include agriculture and the rural economy industrialisation and urbanisation finance and capital political economy and international connections      Public Finance in China Jiwei Lou, Shuilin Wang, 2008-01-31 Since 1980 China's economy has been the envy of the world Its annual growth rate of more than 9 percent during this period makes China today the world's fourth largest economy And this sustained growth has reduced the poverty rate from 60 percent of the population to less than 10 percent However such rapid growth has also increased inequalities in income and access to basic services and stressed natural resources The government seeks to resolve these and other issues by creating a harmonious society shifting priorities from the overriding pursuit of growth to more balanced economic and social development This volume compiles analyses and insights from high level Chinese policy makers and prominent international scholars that address the changes needed in public finance for success in the government's new endeavor It examines such key policy issues as public finance and the changing role of the state fiscal reform and revenue and expenditure assignments intergovernmental relations and fiscal transfers and financing and delivery of basic public goods such as compulsory education innovation public health and social protection And it offers concrete recommendations for immediate policy changes and for China's future reform agenda Public Finance in China is a must read for specialists in public finance and for those seeking an understanding of the complex and daunting challenges China is facing      **Chinese Business** Hong Liu, 2017-07-14 It is difficult to overstate the importance of China to the world economy and yet the majority of books either look at Chinese business by applying Western frameworks or models to the context of China or focus on a particular aspect of business in China Authored by an academic expert on China this new completely revised edition of Chinese Business offers its readers a comprehensive and systematic body of knowledge of Chinese business It has taken a holistic perspective intending to achieve a balance between the academic and practical between theory and practice and between traditional and current Internet based industry The framework of this book subsumes all the major factors that should be taken into consideration when Western companies contemplate a China strategy including history philosophy ancient military classics strategy and marketing innovation Internet business and human resources The discussion of these factors is supplemented with insightful case studies Chinese Business Second Edition can be used as a textbook for undergraduates and postgraduates at business schools and as a useful reference for researchers senior executives consultants and government officials involved in Chinese business      American Studies of Contemporary China David L.
