Bates, 2011-04-10 True Story of Ophthalmologist William H Bates Battle with the Optical industry Eye Surgeons Doctors to Teach and Preserve Natural Eyesight Improvement Bates Method History Black unclear close and distant vision astigmatism crossed wandering eyes cataracts glaucoma and other conditions Natural Eyesight Improvement was practiced years before Dr Bates discovered it It is the normal natural function of the eyes Hidden from the public by eye surgeons Optometrists Optical businesses for over 100 years because this method works is easy anyone can learn teach it including children It produces healthy eyes clear vision and frees the patient from the need to purchase eyeglasses drugs unnecessary eye surgery Yes it can and has reversed cataracts Dr Bates worked his entire life treating people successfully with Natural Eyesight Improvement When he cured the eyes vision of many patients medical students and other doctors in the hospital where he worked with natural treatments without use of eyeglasses surgery drugs and proved his method is fact that some of the old theories of eye function are incorrect the eye surgeons that preferred to sell eyeglasses surgery drugs became angry and expelled him See Reason and Authority http://www.amazon.com/William-H-Bates/e/B004H9DOBC/ref=ntt_athr_dp_pel_pop_1 *Scientific Method* Frederic William Westaway, 1924 *Nicole Oresme's De visione stellarum (On Seeing the Stars)* Dan Burton, 2006-11-01 In this critical edition and translation of Nicole Oresme's *On Seeing the Stars* the renowned 14th century natural philosopher proposes that the stars are not where they seem And perhaps nothing is where it seems In this earliest treatise on atmospheric refraction Oresme uses optics and infinitesimals to help solve this vexing problem of astronomy He is the first to propose that light travels along a curve through the atmosphere two centuries before Hooke and Newton who are credited with the discovery Further he calls all sense data into doubt Oresme's argument concerning the curvature of light is a major milestone in the history of science confirming that Oresme was one of the most innovative scientists of the pre modern world *The Practice of Refraction* Sir Stewart Duke-Elder, 1928 **Concrete Utopianism** Gary Wilder, 2022-08-09 Finalist 2022 Big Other Book Award for Nonfiction Never before has it been more important for Left thinking to champion expansive visions for societal transformation Yet influential currents of critical theory have lost sight of this political imperative Provincial notions of places periods and subjects obstruct our capacity to invent new alignments and envision a world we wish to see Political imagination is misread as optimism Utopianism is conflated with idealism Revolutionary traditions of non liberal universalism and non bourgeois humanism are rendered illegible Negative critique becomes an end in itself Pessimism is mistaken for radicalism and political fatalism risks winning the day In this book Gary Wilder insists that we place solidarity and temporality at the center of our political thinking He develops a critique of Left realism Left culturalism and Left pessimism from the standpoint of heterodox Marxism and Black radicalism These traditions offer precious resources to relate cultural singularity and translocal solidarity

political autonomy and worldwide interdependence They develop modes of immanent critique and forms of poetic knowledge to envision alternative futures that may already dwell within our world traces of past ways of being knowing and relating that persist within an untimely present or charged residues of unrealized possibilities that were the focus of an earlier generation s dreams and struggles or opportunities for dialectical reversals embedded in the contradictory tendencies of the given order Concrete Utopianism makes a bold case for embracing what Wilder calls a politics of the possible impossible Attentive to the non identical character of places periods and subjects insisting that axes of political alignment and contestation are neither self evident nor unchanging reworking Lenin s call to transform the imperial war into a civil war he invites Left thinkers see beyond inherited distinctions between here and there now and then us and them Guided by the spirit of Marx s call for revolutionaries to draw their poetry from a future they cannot fathom yet must nevertheless invent he calls for practices of anticipation that envision and enact call for and call forth seemingly impossible ways of being together He elaborates a critical orientation that emphasizes the dialectical relations between aesthetics and politics political imagination and transformative practice concrete interventions and revolutionary restructuring past dreams and possible worlds means of struggle and its ultimate aims This orientation requires nonrealist epistemologies that do not mistake immediate appearances with the really real Such epistemologies would allow critics to recognize uncanny and untimely aspects of social life whether oppressive or potentially emancipatory They may help actors to render the world subversively uncanny and untimely They may clear pathways for the kind of critical internationalism and concrete utopianism that Left politics cannot afford to ignore
