Protecting the Displaced Sara E. Davies, Luke Glanville, 2010-06-14 This edited collection has sought contributions from some of the foremost scholars of refugee and Internally Displaced Persons (IDP) studies to engage with the conceptual and practical difficulties entailed in realising how the Responsibility to Protect (R2P) can be fulfilled by states and the international community to protect vulnerable persons. Contributors to this book were given one theme to consider based on their experience and knowledge how R2P may be aligned with the protection of the displaced. Contributions explore the history and progress so far in aligning R2P with refugee and IDP protection as well as examining the conceptual and practical issues that arise when attempting to expand R2P from words into deeds.

International Migration Susan F. Martin, 2014-07-31 States have long been wary of putting international migration on the global agenda. As an issue that defines sovereignty—that is, who enters and remains on a state's territory—international migration has called for protection of national prerogatives and unilateral actions. However, since the end of World War I, governments have sought ways to address various aspects of international migration in a collaborative manner. This book examines how these efforts to increase international cooperation have evolved from the early twentieth century to the present. The scope encompasses all of the components of international migration: labor migration, family reunification, refugees, human trafficking and smuggling, and newly emerging forms of displacement including movements likely to result from global climate change. The final chapter assesses the progress and lack thereof in developing an international migration regime and makes recommendations towards strengthening international cooperation in this area.
