Refusing Care Forced Treatment And The Rights Of The Mentally Ill:

Refusing Care Elyn R. Saks, 2024-05-31 It has been said that how a society treats its least well off members speaks volumes about its humanity If so our treatment of the mentally ill suggests that American society is inhumane swinging between overintervention and utter neglect we sometimes force extreme treatments on those who do not want them and at other times discharge mentally ill patients who do want treatment without providing adequate resources for their care in the community Focusing on overinterventionist approaches *Refusing Care* explores when if ever the mentally ill should be treated against their will Basing her analysis on case and empirical studies Elyn R Saks explores dilemmas raised by forced treatment in three contexts civil commitment forced hospitalization for noncriminals medication and seclusion and restraints Saks argues that the best way to solve each of these dilemmas is paradoxically to be both more protective of individual autonomy and more paternalistic than current law calls for For instance while Saks advocates relaxing the standards for first commitment after a psychotic episode she also would prohibit extreme mechanical restraints such as tying someone spread eagled to a bed Finally because of the often extreme prejudice against the mentally ill in American society Saks proposes standards that as much as possible should apply equally to non mentally ill and mentally ill people alike Mental health professionals lawyers disability rights activists and anyone who wants to learn more about the way the mentally ill are treated and ought to be treated in the United States should read *Refusing Care*

A New Era for Mental Health Law and Policy Piers Gooding, 2017-10-13 The Convention on the Rights of Persons with Disabilities CRPD has generated new ideas and standards in healthcare and disability law and policy In the mental health context the CRPD directs governments to ensure people with mental impairments are treated equally before the law including ensuring people have access to the resources necessary to enjoy their rights But what this means in practice remains unclear In addition current domestic laws that authorise involuntary psychiatric interventions stand at cross purposes with the CRPD which requires respect for the will preference and rights of persons with disabilities on an equal basis with others This book explores the implications of the CRPD for law policy and practice that respond to the complex issues raised by mental health impairment and disability It argues that the support framework of the CRPD holds the potential to address persistent shortcomings in mental health law and policy

Becoming a Clinical Psychologist Silvia Fiammenghi, Robert Keisner, Danielle Knafo, 2015-02-06 Whether you are thinking about starting therapy going to graduate school or are yourself a practicing healer of hearts and minds Becoming a Clinical Psychologist Personal Stories of Doctoral Training offers a wealth of useful information about today's training and trainees This book is a collection of accounts written by a diverse group of early career psychologists and doctoral students in their final stages of training Each of the twelve authors provides a deeply personal inside perspective on becoming a therapist Some of the chapters combine qualitative research with the

author's particular experience while others emphasize the author's personal journey as s/he moves from novice to clinician. Some of the issues that are covered include the ways in which training affects personal and professional relationships with spouses, friends, peers, faculty and supervisors and clients; how budding clinicians deal with their own issues and feelings of inadequacy and how trainees learn to develop the right balance of empathy and detachment in working with clients. Also unique to this collection is the diversity reflected in the contributors which include an Orthodox Jewish gay man who came out during training; a Black woman of African descent who found a home in the psychoanalytic approach; a White man who experienced minority status in his mostly female doctoral program; a bisexual White woman who had to negotiate misperceptions and judgments as she moved through her clinical training; and a dissident student who came from another profession and found herself at odds with most of her professors and supervisors about the role of trauma in the etiology of mental illness. *Becoming a Clinical Psychologist* is a compelling read for those both inside and outside the field of psychology.
