A Study in Scarlet (Sherlock Holmes Series) Arthur Conan Doyle, 2012-11. This early work by Arthur Conan Doyle was originally published in 1887 and we are now republishing it with a brand new introductory biography as part of our Sherlock Holmes series. Arthur Conan Doyle was born in Edinburgh, Scotland, in 1859. It was between 1876 and 1881 while studying medicine at the University of Edinburgh that he began writing short stories and his first piece was published in Chambers's Edinburgh Journal before he was 20. In 1887, Conan Doyle's first significant work, *A Study in Scarlet*, appeared in Beeton's Christmas Annual. It featured the first appearance of detective Sherlock Holmes, the protagonist who was to eventually make Conan Doyle's reputation. A prolific writer, Conan Doyle continued to produce a range of fictional works over the following years. We are republishing these classic works in affordable, high quality modern editions using the original text and artwork.

A Study in Scarlet Arthur Conan Doyle, Sir, Richard Gutschmidt, 2014-02-04. *A Study in Scarlet* is a detective mystery novel written by Sir Arthur Conan Doyle, introducing his new characters consulting detective Sherlock Holmes and his friend and chronicler Dr John Watson, who later became two of the most famous literary characters in detective fiction. Conan Doyle wrote the story in 1886 and it was published the next year. The book's title derives from a speech given by Holmes to Doctor

Watson on the nature of his work in which he describes the story's murder investigation as his study in scarlet. There's the scarlet thread of murder running through the colourless skein of life and our duty is to unravel it and isolate it and expose every inch of it. The story and its main characters attracted little public interest when it first appeared. Only 11 complete copies of Beeton's Christmas Annual 1887 are known to exist now and they have considerable value. Although Conan Doyle wrote 56 short stories featuring Holmes, *A Study in Scarlet* is one of only four full-length novels in the original canon. The novel was followed by *The Sign of the Four* published in 1890. *A Study in Scarlet* was the first work of fiction to incorporate the magnifying glass as an investigative tool. Reception Reviewer Alex Baker noted that "By later standards of detective fiction, *A Study in Scarlet* violates a cardinal rule: there is no way for intelligent readers to work out the solution for the mystery by themselves. The very first time that the reader hears of Jefferson Hope is when Holmes arrests him as the murderer. Nor is any previous hint given of Drebbler and Stangerson's Mormon background. However, at the time when it was written, this rule did not yet exist and detective fiction in general was taking its very first steps to which this book greatly contributed."

Edit Part I leads with a heading which establishes the role of Dr Watson as narrator and sets up the narrative standpoint that the work to follow is not fiction but fact. Being a Reprint from the Reminiscences of John H. Watson, M.D., Late of the Army Medical Department. The story begins in 1881, when Dr Watson, having returned to London after serving in the Second Anglo-Afghan War, visits the Criterion Restaurant and runs into an old friend named Stamford. Stamford, who had been a dresser under him at St. Bartholomew's Hospital, confides in Watson that, due to a shoulder injury that he sustained at the Battle of Maiwand, he has been forced to leave the armed services and is now looking for a place to live. Stamford mentions that an acquaintance of his, Sherlock Holmes, is looking for someone to split the rent at a flat at 221B Baker Street, but he cautions Watson about Holmes's eccentricities. Stamford takes Watson back to St. Bartholomew's, where in a laboratory they find Holmes experimenting with a reagent seeking a test to detect human haemoglobin. Holmes explains the significance of bloodstains as evidence in criminal trials. After Stamford introduces Watson to Holmes, Holmes shakes Watson's hand and comments, "You have been in Afghanistan, I perceive." Though Holmes chooses not to explain why he made the comment, Watson raises the subject of their parallel quests for a place to live in London, and Holmes explains that he has found the perfect place in Baker Street. At Holmes's prompting, the two review their various shortcomings to make sure that they can live

together After seeing the rooms at 221B they move in and grow accustomed to their new situation Watson is amazed by Holmes who has profound knowledge of chemistry and sensational literature very precise but narrow knowledge of geology and botany yet knows little about literature astronomy philosophy and politics Holmes also has multiple guests visiting him at different intervals during the day

you he said cordially gripping my hand with a strength for which I should hardly have given him credit You have been in Afghanistan I perceive How on earth did you know that I asked in astonishment Never mind said he chuckling to himself The question now is about haemoglobin No doubt you see the significance of this discovery of mine It is interesting chemically no doubt I answered but practically Why man it is the most practical medico legal discovery for years Don't you see that it gives us an infallible test for blood stains Come over here now He seized me by the coat sleeve in his eagerness and drew me over to the table at which he had been working Let us have some fresh blood he said digging a long bodkin into his finger and drawing off the resulting drop of blood in a chemical pipette Now I add this small quantity of blood to a litre of water You perceive that the resulting mixture has the appearance of pure water The proportion of blood cannot be more than one in a million I have no doubt however that we shall be able to obtain the characteristic reaction As he spoke he threw into the vessel a few white crystals and then added some drops of a transparent fluid In an instant the contents assumed a dull mahogany colour and a brownish dust was precipitated to the bottom of the glass jar Ha ha he cried clapping his hands and looking as delighted as a child with a new toy What do you think of that It seems to be a very delicate test I remarked Beautiful beautiful The old Guaiacum test was very clumsy and uncertain So is the microscopic examination for blood corpuscles The latter is valueless if the stains are a few hours old Now this appears to act as well whether the blood is old or new Had this test been invented there are hundreds of men now walking the earth who would long ago have paid the penalty of their crimes Indeed I murmured Criminal cases are continually hinging upon that one point A man is suspected of a crime months perhaps after it has been committed His linen or clothes are examined and brownish stains discovered upon them Are they blood stains or mud stains or rust stains or fruit stains or what are they That is a question which has puzzled many an expert and why Because there was no reliable test Now we have the Sherlock Holmes test and there will no longer be any difficulty
