## **Shifting Gears:**

Shifting Gears Cecelia Tichi, 2017-10-01 *Shifting Gears* is a richly illustrated exploration of the American era of gear and girder technology. From the 1890s to the 1920s, machines and structures shaped by this technology emerged in many forms from automobiles and harvesting machines to bridges and skyscrapers. The most casual onlooker to American life saw examples of the new technology on Main Street, on the local railway platform, and in the pages of popular magazines. A major consequence of this technology was its effect on the arts, in particular the literary arts. Three prominent American writers of the time, Ernest Hemingway, John Dos Passos, and William Carlos Williams, became designer engineers of the word. Tichi reveals their use of prefabricated manufactured components in poems and prose. As designers, they enacted in style and structure the new technological values. The writers, according to Tichi, thought of words themselves as objects for assembly into a design. Using materials from magazines, popular novels, movie reviews, the toy industry, and advertising, as well as the texts of the nation's major enduring writers, Tichi shows how the turn of the century technology pervaded every aspect of American culture and how this culture could be defined as a collaborative effort of the engineer, the architect, the fiction writer, and the poet. She demonstrates that a technological revolution is not a revolution only of science but of language as well. Originally published in 1987, *A UNC Press Enduring Edition*. UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. *Shifting Gears* Eddie Thrasher, 2011-12-06 September 11, a day that in some way has either directly or indirectly changed everyone in America, if not the world's way of life. Whether it is a person's sense of security, travel plans, outlook on life, or the way they view their family, 9/11, as they call it, changed us all, including me. But my 9/11 didn't happen in 2001; it happened exactly two years earlier, in 1999. With September 11 being my birthday, I received a unique present on that day that changed my life. It was then that I first realized that life wasn't the fairytale world that I thought it was. As I saw my world crumble down, I had no choice but to turn a negative into a positive. Remembering the advice from a person whom I had never met, telling me to believe in myself, never give up, and to never take the easy way out, I knew that I could battle through anything and win in the long run. Little did I know that present was the opening to my future and to my life's goal that I was out to achieve.

The Wise Company Ikujiro Nonaka, Hirotaka Takeuchi, 2019-09-13 High velocity change is the fundamental challenge facing companies today Few companies however are prepared to continuously innovate because they focus on the short term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society Practical wisdom is the basis of continuous innovation where companies ceaselessly and repeatedly creating new knowledge disseminating it throughout the organization and converting knowledge to action over time In *The Wise Company* legendary management experts Ikujiro Nonaka and Hirotaka Takeuchi highlight how various companies have confronted the challenge of rapid change to create new products and new ways of doing business that benefit employees consumers and society The key a relentless self renewal process where companies realize the future they envision rather than only responding to changes in the environment Nonaka and Takeuchi argue that while knowledge creating companies focusing on tacit and explicit knowledge can generate innovation they cannot create it on a continuous and ongoing basis without having wisdom about human interactions and how they influence organizational structures and practices Companies that have resilience longevity and sustainability share a number of characteristics Nonaka and Takeuchi show Strategies are based on alignment of organizational and societal benefits Leaders grasp the core of any situation or problem quickly and intuitively comprehend the nature and meaning of people things and events But wise leadership is not enough wisdom must infuse the organization

through informal as well as formal shared interactions and communications that focus on metaphors and stories that convey the essence and meaning of strategies and actions In short Nonaka and Takeuchi demonstrate how continuous innovation results from companies ceaselessly and repeatedly creating new knowledge disseminating knowledge throughout the organization and converting that knowledge to action The Wise Company presents a new model of knowledge creation and practice for the twenty first century
