Nick Ball, Simon Stephens, 2018-07-30 A beautifully illustrated history of the early ship models of the Royal Navy that are prized today as works of art From about the middle of the seventeenth century the Royal Navy's administrators began to commission models of their ships that were accurately detailed and for the first time systematically to scale These developed a recognized style which included features like the unplanked lower hull with a simplified pattern of framing that emphasized the shape of the underwater body Exquisitely crafted these were always rare and highly prized objects indeed Samuel Pepys expressed a profound desire to own one and today they are widely regarded as the acme of the ship modeler's art Today examples are the highlights of collections across the world valued both as art objects and as potential historical evidence on matters of ship design However it was only recently that researchers began to investigate the circumstances of their construction their function and the identities of those who made them This book by two curators who have worked on the world's largest collection of these models at the National Maritime Museum in Greenwich England summarizes the current state of knowledge outlines important discoveries and applies this newfound understanding to many of the finest models in the collection As befits its subject Navy Board Ship Models is visually striking with numerous color photographs that make it as attractive as it is informative to anyone with an interest in modelmaking or historic ships Creative Ship Model Making
Gerhard O.W. Fischer, It is often annoying that every kit model built from the same kit of the same company is like one egg from the other This is what creative ship modelling aims to change Using prefabricated hulls it is mainly a matter of the superstructure which must be redesigned sawn out and further processed and further processed without the need for a construction template The conversion of kit models shows how to convert ready built models to a completely new model by converting them to jet propulsion Finally the author presents four examples how larger display models can be converted into real driving models to properly running RC ship models by installing a remote control system From the content Construction of models according to own designs Building description of two creative models Building a police boat according to own ideas Two creative construction models The MULTIBOAT A speedboat and a mega luxury yacht Conversion of kit models The FLORIDA as a jet model The RAPIDO 600 as a jet model A customs cruiser and a fishery protection boat Conversion of display models to RC models Cruise ship QUEEN MARY 2 Sea rescue cruiser HERMANN MARWEDE German submarine class VII C American submarine GATO class REVELL RC ship model already at the end of the 50s The Rudder Thomas Fleming Day, 1929 **Building Ship Models** George B. Douglas, Joseph T. Higgins, 1998-01-12 Clearly written text detailed illustrations and full size working plans provide novices and experienced model builders with all the information they need to create exact replicas of two 19th century sailing ships the Benjamin F Packard a classic American clipper and the Alice Mandell a famous whaler The one volume edition of two rare model building manuals also devotes chapters to ship's rigging
