Shipping Out Anita Gonzalez, 2025-02-25 Shipping Out Race Performance and Labor at Sea provides a rare perspective on performance by staff above and below deck on Caribbean cruise ships as viewed through the lenses of race class and gender Drawing on her experiences as a destination lecturer on Caribbean cruise lines for twenty years Anita Gonzalez offers a unique viewpoint as she examines contemporary Caribbean cruise culture as an ethnographically complex site where North American and European travelers are exposed to other cultures through the orchestrated experiences on ship and via excursions to ports Gonzales argues that the cruise ship experience is deliberately crafted to deliver the best immersive performance by its workers However the workers never leave the theater they merely move below deck and like ships stewards and cooks from previous centuries they work within an imaginary where Global Majority people are envisioned as servants By utilizing ethnography and archival materials to illustrate ship workers experiences on contemporary cruise ships and then contrasting those circumstances with the personal accounts of workers on historical merchant ships Shipping Out illuminates how workers presence on ships complicates notions of freedom and enslavement home and journey place and space

BOOK JACKET *Green, Smart and Connected Transportation Systems* Wuhong Wang, Martin Baumann, Xiaobei Jiang, 2020-03-23 These proceedings gather selected papers from the 9th International Conference on Green Intelligent Transportation Systems and Safety held in Guilin China on July 1-3 2018 They feature cutting edge studies on Green Intelligent Mobility Systems the guiding motto being to achieve green intelligent and safe transportation systems The contributions presented here can help promote the development of green mobility and

intelligent transportation technologies to improve interconnectivity resource sharing flexibility and efficiency Given its scope the book will benefit researchers and engineers in the fields of Transportation Technology and Traffic Engineering Automotive and Mechanical Engineering Industrial and System Engineering and Electrical Engineering alike Shipping and Development in Dubai Keith Nuttall,2021-10-21 A small town on a sandy creek half a century ago Dubai is now the largest trading commercial leisure and transport entrepot in the Gulf and wider region This book explains the reasons for the emergence of Dubai and its distinctive development trajectory arguing that the decision in the 1970s to invest in infrastructure made possible by shipping containerization laid the foundations for its future expansion The book shows that in contrast to its competitors hydrocarbon rentier economic model Dubai s creation and expansion of ports and airports together with value added logistics and business friendly enhancements were used to out compete regional rivals Drawing on a range of primary and secondary sources including interviews with logistics business people government records memoirs it fills a significant lacuna in the history of Dubai s development and emergence as a global trade hub Intermodal Freight Terminals Jason Monios,Rickard Bergqvist,2016-05-20 Much work has been done on port governance yet little has addressed intermodal terminal governance despite the clear similarities This book fills that gap by establishing a governance framework for situating analysis of intermodal terminals throughout their life cycle A version of the product life cycle theory is amended with governance theory to produce a framework covering each stage of the terminal s life cycle from the initial planning to the many decisions taken regarding the public private split in funding mechanisms ownership selecting an operator specifying KPIs to the operator setting fees earning profit ensuring fair access to all rail service operators and finally to reconcessioning the terminal to a new operator managing the handover and maintaining the terminal throughout its life cycle An institutional analysis of stakeholder relations situated within a governance framework illuminates these issues and enables not only conceptualisation and greater understanding of the geography of intermodal transport but also decision making and goal setting by planners and policy makers This book thus has three functions first as a textbook on the planning and operation of intermodal terminals second as a presentation of recent empirical research on intermodal terminal governance third as a framework for future research in which the broad field of analysis of intermodal transport can be viewed through a single lens and used to inform geographers policymakers and planners *Institutional Challenges to Intermodal Transport and Logistics* Jason Monios,2016-05-23 While the operational realities of intermodal transport are relatively well known the institutional challenges are less well understood This book provides an overview of intermodal transport and logistics including the policy background emerging industry trends and academic approaches Establishing the three key features of intermodal transport geography as intermodal terminals inland logistics and hinterland corridors Jason Monios takes an institutional approach to understanding the difficulties of successful intermodal transport and logistics Key areas of investigation include the policy and planning background the roles of public and private stakeholders and the

identification of emerging strategy conflicts Substantial empirical content situates the theoretical and practical issues in real world examples via three detailed case study chapters covering the USA UK and Europe making the book useful to students as well as practitioners desiring an understanding of how intermodal transport and logistics work in practice The identified challenges to intermodal transport and logistics are used to demonstrate how competing port and inland strategies can inhibit the necessary processes of integration required to underpin successful intermodal transport The book concludes with a look at the future of institutional adaptation that may enhance the capacity of freight actors to engage with intermodal transport developments

Ship Gregory Votolato, 2012-01-01 From oar powered quinqueremes to steam powered freighters to luxury ocean liners such as the Titanic to aircraft carriers like the Abraham Lincoln ships have played an integral role in trade transportation and war throughout history Today ships remain the largest and most expensive moving objects on the planet engineers and designers constantly push the limits of design creating vessels that continue to rival newer technologies such as airplanes and cars But unlike other more common modes of transportation the great ships of the world travel in the deep oceans out of sight and out of mind until that is something goes wrong In Ship Gregory Votolato explores the fiction and the reality of modern ships the technology that creates them and the events that can lead to disasters such as the Exxon Valdez or Amoco Cadiz Here Votolato delves into the world of the ship describing the unpredictable and often hostile environment of weather at sea the resurgent threats posed by pirates and the responsibilities of captains and crews onboard Ship sbroad overview of technology and design also offers unique insights into this extraordinary result of human creativity Votolato s book will appeal to readers interested in the general design history of ships as well as their social political and technological impact on our modern world

Monsoon Robert D. Kaplan, 2010-10-19 On the world maps common in America the Western Hemisphere lies front and center while the Indian Ocean region all but disappears This convention reveals the geopolitical focus of the now departed twentieth century but in the twenty first century that focus will fundamentally change In this pivotal examination of the countries known as Monsoon Asia which include India Pakistan China Indonesia Burma Oman Sri Lanka Bangladesh and Tanzania bestselling author Robert D Kaplan shows how crucial this dynamic area has become to American power It is here that the fight for democracy energy independence and religious freedom will be lost or won and it is here that American foreign policy must concentrate if the United States is to remain relevant in an ever changing world From the Horn of Africa to the Indonesian archipelago and beyond Kaplan exposes the effects of population growth climate change and extremist politics on this unstable region demonstrating why Americans can no longer afford to ignore this

important area of the world The SAGE Handbook of Marxism Beverley Skeggs, Sara R. Farris, Alberto Toscano, Svenja Bromberg, 2021-11-17 The past decade has witnessed a resurgence of interest in Marxism both within and without the academy Marxian frameworks concepts and categories continue to be narratively relevant to the features and events of contemporary capitalism Most crucially an attention to shifting cultural conditions has lead contemporary researchers to re confront some classical and essential Marxist concepts as well as elaborating new critical frameworks for the analysis of capitalism today The SAGE Handbook of Marxism showcases this cutting edge of today s Marxism It advances the debate with essays that rigorously map and renew the concepts that have provided the groundwork and main currents for Marxist theory and showcases interventions that set the agenda for Marxist research in the 21st century A rigorous and challenging collection of scholarship this book contains a stunning range of contributions from contemporary academics writers and theorists from around the world and across disciplines invaluable to scholars and graduate students alike Part 1 Reworking the critique of political economy Part 2 Forms of domination subjects of struggle Part 3 Political perspectives Part 4 Philosophical dimensions Part 5 Land and existence Part 6 Domains Part 7 Inquiries and debates **The Geography of Transport Systems** Jean-Paul Rodrigue, Claude Comtois, Brian Slack, 2013-07-18 Mobility is fundamental to economic and social activities such as commuting manufacturing or supplying energy Each movement has an origin a potential set of intermediate locations a destination and a nature which is linked with geographical attributes Transport systems composed of infrastructures modes and terminals are so embedded in the socio economic life of individuals institutions and corporations that they are often invisible to the consumer This is paradoxical as the perceived invisibility of transportation is derived from its efficiency Understanding how mobility is linked with geography is main the purpose of this book The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of transportation This text provides greater discussion of security energy green logistics as well as new and updated case studies a revised content structure and new figures Each chapter covers a specific conceptual dimension including networks modes terminals freight transportation urban transportation and environmental impacts A final chapter contains core methodologies linked with transport geography such as accessibility spatial interactions graph theory and Geographic Information Systems for transportation GIS T This book provides a comprehensive and accessible introduction to the field with a broad overview of its concepts methods and areas of application The accompanying website for this text contains a useful additional material including digital maps PowerPoint slides databases and links to further reading and websites The website can be accessed at <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography as well as those interest in economic and urban geography transport planning and engineering The Way of the Ship Alex Roland, W.
