Ships and Shipping in the North Sea and Atlantic, 1400-1800 Richard W. Unger, 2019-05-23 First published in 1997 this collection of articles two of which hitherto only appeared in Dutch examines the technical changes in shipbuilding as well as new practices in shipping and fishing from the late Middle Ages to the Industrial Revolution It seeks to show how these changes transformed the European economy and affected the relationship between the economy and governments and to portray the process although most dramatic in the Dutch Republic as part of a general European

The history of a ship, from her cradle to her grave. With a short account of modern steam ships and torpedoes Ben (grandpa, pseud.),1882 Sailing Ships and Their Story :the Story of Their Development from the Earliest Times to the Present Day Edward Keble Chatterton,1915

Art in History/History in Art David Freedberg,Jan de Vries,1996-07-11 Historians and art historians provide a critique of existing methodologies and an interdisciplinary inquiry into seventeenth century Dutch art and culture **Sailing Ships** E. Keble Chatterton,2017-10-26 Excerpt from *Sailing Ships The Story of Their Development From the Earliest Times to the Present Day* I trust that both the yachtsman and sailorman will find in these pages something of the same exciting pleasure which has been mine in tracing the course of the evolutions through which their ships have passed Those whose work or amusement it is to acquaint themselves with the sailing ship and her ways and for lack of time and Opportunity are unable to seek out the noble pedigree of what Ruskin truly described as one of the loveliest things man ever made and one of the noblest may care to learn what were the changing conditions which combined to bring about such a highly complex creature as the modern sailing ship Perhaps at some time when handling a rope a spar a tiller or a sail they may have wondered how it all began what were the origins of all those various parts of a ships furniture why some essential portions have scarcely changed and how other portions are the outcome of time Experiment and science I hope that to neither the amateur nor the professional sailor I shall seem impertinent if I have attempted to tell them something about their ship which they did not know before But if on the other hand I shall have succeeded in increasing their love for the sailing ship by outlining her career I trust that this may be allowed to counterbalance the defects which in a subject of so vast a scope are hardly to be avoided in spite of considerable care and the generous assistance of many kind friends Finally I make my appeal to the younger generation to whom ships and the sea have in all times suggested so much that is bound up with adventure and brave deeds The present moment sees us at a stage in the history of ships when the Royal Navy as a whole and the Merchant Service almost entirely have no longer any convenience for sail There is a dire need in the latter for both officers and men whilst on shore the conditions of employment are exactly the reverse About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The History of Rome, ... Translated, ... by G. Baker ... A New Edition, Etc* Livy,1835 The Annual Review, and History of Literature ,1806 **The History of Rome** Livy,1852 *Re-inventing the Ship* Don Leggett,2016-04-08 Ships have histories that are

interwoven with the human fabric of the maritime world In the long nineteenth century these histories revolved around the re invention of these once familiar objects in a period in which Britain became a major maritime power This multi disciplinary volume deploys different historical geographical cultural and literary perspectives to examine this transformation and to offer a series of interconnected considerations of maritime technology and culture in a period of significant and lasting change Its ten authors reveal the processes involved through the eyes and hands of a range of actors including naval architects dockyard workers commercial shipowners and Navy officers By locating the ship s re invention within the contexts of builders owners and users they illustrate the ways in which material elements as well as scientific artisan and seafaring ideas and practices were bound together in the construction of ships complex identities
