Shooting Stars And Other Deadly Things:

Mystery Women, Volume Three (Revised) Colleen Barnett, 2010-12-31 Like other fictional characters female sleuths may live in the past or the future They may represent current times with some level of reality or shape their settings to suit an agenda There are audiences for both realism and escapism in the mystery novel It is interesting however to compare the fictional world of the mystery sleuth with the world in which readers live Of course mystery readers do not share one simplistic world They live in urban suburban and rural areas as do the female heroines in the books they read They may choose a book because it has a familiar background or because it takes them to places they long to visit Readers may be rich or poor young or old conservative or liberal So are the heroines What incredible choices there are today in mystery series This three volume encyclopedia of women characters in the mystery novel is like a gigantic menu Like a menu the descriptions of the items that are provided are subjective Volume 3 of Mystery Women as currently updated adds an additional 42 sleuths to the 500 plus who were covered in the initial Volume 3 These are more recently discovered sleuths who were introduced during the period from January 1 1990 to December 31 1999 This more than doubles the number of sleuths introduced in the 1980s 298 of whom were covered in Volume 2 and easily exceeded the 347 series and some outstanding individuals described in Volume 1 which covered a 130 year period from 1860 1979 It also includes updates on those individuals covered in the first edition changes in status short reviews of books published since the first edition through December 31 2008 **Sleuths in Skirts** Frances A. DellaCava, Madeline H. Engel, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality **The Publishers Weekly**, 1999

Trigrams Paul E. Selinger, 2005-04-12 The National League of American Pen Women 2001 Soul Making Literary Prize Winner Honorable Mention for the work *Trigrams* Sisterly rivalries jealousy envy love and the competition for parental approval are crosscurrents that operate below the surface among four talented teen aged sisters of the Lee family wealthy Koreans living in 1940 s Shanghai Their family's dynamics become subsumed and greatly complicated when the communists take over China in 1949 and the Lees are forced to abandon their home They flee to Korea a land they have never seen Within months the Korean War breaks out and they are swept into its maelstrom Three days later their home is overrun They endure forced labor at the hands of a hostile North Korean army with the threat of violent death at any time Again they must flee abandoning their new home and every possession There is no choice but to accept their loss and join the hordes of homeless refugees moving south away from the battleground Ultimately they have to separate in the dead of winter to find refuge at the mercy of not always welcoming distant relatives whom they have never met Ai li Lee seventeen when the book

opens is the narrator In a simple girl s voice she relates how she her parents and siblings struggle to survive and keep the family intact To prevail they faced bitter passions within and beyond their family of violent rape betrayal infidelity revenge political intrigue and murder Desperate for guidance during their crises Ai li and her closest brother Eddie turn to the I Ching the ancient Chinese oracle their revered grandfather had relied on in Shanghai They hope the secrets of its trigrams will reveal their wisdom to them too

CHEER UP FOR THINGS

COULD GET WORSE! John Balwigaire, 2016-01-15 Somewhere along the line each one of us must experience some kind of adversities before we can grow up to become mature responsible adults God intended for us to be After suffering such a devastating rejection from the beautiful girl he loved so dearly Kibonzo s story is intended to help people of all walks of life but mostly those who have experienced some sort of rejection to understand how God can use different ways or methods to build a fruitful character in each one of us which later could be used not only for our own benefits but for all mankind

Ralph Compton Fatal Justice David Robbins, Ralph Compton, 2009-12-01 In this Ralph Compton western a lawman seeks both retribution and justice but his time is running out Years ago Marshal Asher Thrall shot mad dog killer Ben Sharkey in the leg to save a fellow lawman Since then every crooked step has reminded Sharkey of the man who put a bullet in him And he s just repaid the favor to the marshal in spades When Ash comes to he s all too eager to ride after his nemesis But time is against him Because while Sharkey shot three times the doctor only removed two slugs The third is still in Ash s chest and with every breath every heartbeat it is moving closer to ending his life Ash knows he s a walking dead man But before he dies he s going to make sure that Sharkey is one step ahead of him More Than Eight Million Ralph Compton Books In Print

Impact! Gerrit L. Verschuur, 1997-12-18 Most scientists now agree that some sixty five million years ago an immense comet slammed into the Yucatan detonating a blast twenty million times more powerful than the largest hydrogen bomb punching a hole ten miles deep in the earth Trillions of tons of rock were vaporized and launched into the atmosphere For a thousand miles in all directions vegetation burst into flames There were tremendous blast waves searing winds showers of molten matter from the sky earthquakes and a terrible darkness that cut out sunlight for a year enveloping the planet in freezing cold Thousands of species of plants and animals were obliterated including the dinosaurs some of which may have become extinct in a matter of hours In Impact Gerrit L Verschuur offers an eye opening look at such catastrophic collisions with our planet Perhaps more important he paints an unsettling portrait of the possibility of new collisions with earth exploring potential threats to our planet and describing what scientists are doing right now to prepare for this awful possibility Every day something from space hits our planet Verschuur reveals In fact about 10 000 tons of space debris fall to earth every year mostly in meteoric form The author recounts spectacular recent sightings such as over Allende Mexico in 1969 when a fireball showered the region with four tons of fragments and the twenty six pound meteor that went through the trunk of a red Chevy Malibu in Peekskill New York in 1992 the meteor was subsequently sold for 69 000 and the car itself fetched 10 000 But meteors are not the greatest threat to life

on earth the author points out The major threats are asteroids and comets The reader discovers that astronomers have located some 350 NEAs Near Earth Asteroids objects whose orbits cross the orbit of the earth the largest of which are 1627 Ivar 6 kilometers wide and 1580 Betula 8 kilometers Indeed we learn that in 1989 a bus sized asteroid called Asclepius missed our planet by 650 000 kilometers a mere six hours and that in 1994 a sixty foot object passed within 180 000 kilometers half the distance to the moon Comets of course are even more deadly Verschuur provides a gripping description of the small comet that exploded in the atmosphere above the Tunguska River valley in Siberia in 1908 in a blinding flash visible for several thousand miles every tree within sixty miles of ground zero was flattened He discusses Comet Swift Tuttle the most dangerous object in the solar system a comet far larger than the one that killed off the dinosaurs due to pass through earth s orbit in the year 2126 And he recounts the collision of Comet Shoemaker Levy 9 with Jupiter in 1994 as some twenty cometary fragments struck the giant planet over the course of several days casting titanic plumes out into space when Fragment G hit it outshone the planet on the infrared band and left a dark area at the impact site larger than the Great Red Spot In addition the author describes the efforts of Spacewatch and other groups to locate NEAs and evaluates the idea that comet and asteroid impacts have been an underrated factor in the evolution of life on earth Astronomer Herbert Howe observed in 1897 While there are not definite data to reason from it is believed that an encounter with the nucleus of one of the largest comets is not to be desired As Verschuur shows in Impact we now have substantial data with which to support Howe s tongue in cheek remark Whether discussing monumental tsunamis or the innumerable comets in the Solar System this book will enthrall anyone curious about outer space remarkable natural phenomenon or the future of the planet earth

Warwick-Smith, 2006-06-05 Scientific proof validating the legends and myths of ancient floods fires and weather extremes
Presents scientific evidence revealing the cause of the end of the last ice age and the cycles of geological events and species extinctions that followed Connects physical data to the dramatic earth changes recounted in oral traditions around the world
Describes the impending danger from a continuing cycle of catastrophes and extinctions There are a number of puzzling mysteries in the history of Earth that have yet to be satisfactorily explained by mainstream science the extinction of the dinosaurs the vanishing of ancient Indian tribes the formation of the mysterious Carolina Bays the disappearance of the mammoths the sudden ending of the last Ice Age and the cause of huge underwater landslides that sent massive tsunamis racing across the oceans millennia ago Eyewitness accounts of these events are chronicled in rich oral traditions handed down through generations of native peoples The authors recent scientific discoveries link all these events to a single cause In The Cycle of Cosmic Catastrophes Richard Firestone Allen West and Simon Warwick Smith present scientific evidence about a series of prehistoric cosmic events that explains why the last Ice Age ended so abruptly Their findings validate the ubiquitous legends and myths of floods fires and weather extremes passed down by our ancestors and show how these legendary events relate to each other Their findings also support the idea that we are entering a thousand year cycle of increasing danger and possibly a new cycle of extinctions
