A Cultural History of Shopping in the Modern Age Vicki Howard, 2022-06-02. *A Cultural History of Shopping* was a Library Journal Best in Reference selection for 2022. In the modern consumer age that emerged after the First World War, shopping became a ubiquitous cultural practice. Despite its apparent universality, the historicity and contingency of shopping should not be ignored; its meaning was always inextricably linked to the political, material, and economic contexts within which it took place. Gendered female for the most part, shopping continued to evoke different cultural responses, embraced as liberatory by some, condemned as frivolous by others. Business decisions and public policies helped construct the frameworks within which new, often American-led shopping cultures emerged, from downtown department stores to chain stores to suburban shopping malls. The digital revolution in shopping that began in the last decade of the 20th century has changed the face of cities and towns and led to the closure of many bricks-and-mortar stores, but as this volume explores, the shopper remains very much at the center of Western capitalist societies. *A Cultural History of Shopping in the Modern Age* presents an overview of the period with themes addressing practices and processes, spaces and places, shoppers and identities, luxury and everyday, home and family, visual and literary representations, reputation, trust, and credit, and governance, regulation, and the state.

*A Cultural History of Shopping in the Age of Revolution and Empire* Erika Rappaport, 2022-06-02. *A Cultural History of Shopping* was a Library Journal Best in Reference selection for 2022. Shopping emerged as a special pleasure and problem during the period between the revolutionary upheavals of the late 18th century and the opening salvos of the Great War. New shops, new products, new class and gender ideologies, new standards of comfort and hygiene, and rising living standards for some meant that people, especially women, spent more time shopping and engaging in consumer-oriented activities beyond the walls of the shop. At the same time, social commentators, local and national authorities, economists, and many husbands became concerned about the dangers of shopping, believing that the department store was emancipating women and destroying society in the process. This volume explores shopping in the 19th century as a varied and embedded social, political, economic, and cultural activity. It draws out the continuities with earlier periods as well as examining how the department store came to be seen as
