Tax Treaties: Building Bridges between Law and Economics ,2010 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law In order to encourage the much needed communication between these two groups a cross disciplinary conference was held to discuss selected tax treaty issues from both a legal and economic perspective Twenty five conference papers on eight topics were prepared by lawyers and economists The papers on legal issues were presented and discussed by economists and vice versa The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group The outcome of the conference is reflected in this book By showing the legal and the economic approaches to an issue this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts Twenty two contributions are included written by the most distinguished academics practitioners and representatives of several international tax administrations and both tax and economic institutions
