Integrated Global Models of Sustainable Development - Volume II Akira Onishi, 2009-08-18. Integrated Global Models of Sustainable Development is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. In the 21st century, the human society is facing the challenge of sustainable development with constraints of global environmental changes. In order to cope with poverty and international per capita income disparity, IPCID, there should be further needs for economic development to provide employment opportunities against Terrorism and refugees. The coverage in three volumes tries to show a possibility of sustainable development from a global viewpoint by using alternative policy simulations. The chapters are organized so that the readers might understand archived historical trends in global modeling for sustainable development. Starting from global models in the 1970s, 1980s, 1990s, the updated latest modeling works are also included as far as possible. The chapters deal with roles of integrated global models, scope and methodologies, and policy implications. These three volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel, and Policy analysts, managers, and decision makers, and NGOs.

Mirrors of the Economy Yoshiko M. Herrera, 2017-08-28. As international institutions multiply and more governments sign on to standardized ways of organizing economies and societies, resistance to globalization persists. In *Mirrors of the Economy*, Yoshiko M. Herrera explores the variance in implementation of international institutions through an examination of the international System of National Accounts (SNA) and, in particular, the success of post-Soviet Russia and other formerly communist countries in implementing the SNA. The SNA is the basis for all national economic indicators, including Gross Domestic Product, and is therefore a critical institution for economic policy and development. Herrera tests existing theories of implementation of international institutions and proposes a novel theoretical concept: conditional norms. She suggests that the conditions attached to norms may result in institutional change. On the basis of content analysis of statistical publications and more than seventy-five interviews throughout Russia, particularly in Moscow and in Washington, she forms a clear picture of the implementation of the SNA in Russia in the early 1990s. In Soviet times, a stable conditional norm delineated the appropriateness of statistical institutions based on the structure of the economy. The transformation of the economic system triggered a shift in support among Russian and Eastern European statisticians in favor of the SNA. Herrera's argument increases our understanding of the role of norms, structural conditions, and professional communities in institutional implementation.
