## National Geographic Russia Map:

**Russia Classic** National Geographic Maps, National Geographic Maps - Reference, 2012-01-01 National Geographic's political map of Russia and the independent states of the former Soviet Union is one of the most authoritative maps of the region. This Classic style wall map features a bright color palette with blue oceans and the country's terrain detailed in stunning shaded relief that has been a hallmark of National Geographic maps for over 75 years. Thousands of place names, accurate political boundaries, bodies of water, and major infrastructure networks such as roadways, airports, canals, oil pipelines, and railroads are detailed. Coastal bathymetry is shown with depth curves and soundings, and the boundaries of the Northern Sea shipping routes are marked as well. Coverage also includes Norway, Sweden, Finland, Denmark, Latvia, Lithuania, Estonia, Ukraine, Belarus, Georgia, Armenia, Azerbaijan, Turkmenistan, Uzbekistan, Kazakhstan, Kyrgyzstan, Tajikistan, Afghanistan, Mongolia, North Korea, South Korea, and Japan, as well as portions of Germany, Poland, Iran, Pakistan, and China. The map is encapsulated in heavy duty 1.6 mil laminate, which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale 1:12,617,000. Sheet Size 30.25 x 23.5. *National Geographic Russia and the Independent Nations of the Former Soviet Union* MapQuest.com, Incorporated, National Geographic Society, 1999-05-01. Library,1944 *National Geographic Kids World Atlas* National Geographic Society (U.S.),National Geographic,2013 Presents world regional and thematic maps as well as photographic essays on each continent After the Map William Rankin,2016-07 Over the course of the twentieth century there was a major shift in practices of mapping as centuries old methods of land surveying and print publication were incrementally displaced by electronic navigation systems William Rankin argues that although this shift did not render traditional maps obsolete it did revise the goals of the mapping sciences as a whole Military cartographers and civilian agencies alike developed new techniques for tasks that exceeded the capabilities of paper such as aiming long range guns navigating in featureless environments regularizing air travel or drilling for offshore oil *After the Map* reveals the major conceptual ramifications of these and other changes and in doing so offers a new way of understanding the central political geographic shift of the twentieth century Seen first and foremost as affecting a transformation in the nature of territory the change from paper mapping to electronic systems is not a story about technological improvement or the wizardry of precision instead it is about the kind of geographic knowledge and therefore governance that can exist in the first place **Exploring World History**
