National Interests And The Military Use Of Space:

National Interests and the Military Use of Space William J. Durch, 1984 *Bulletin of the Atomic Scientists*, 1985-06
Basic Aerospace Doctrine of the United States Air Force Dennis M. Drew, 1992 **Bulletin of the Atomic Scientists**, 1985-06 *Bulletin of the Atomic Scientists*, 1985-06 **In the National Interest** Benjamin Frankel, 1990 This reader contains a sample of the best essays published in the foreign policy quarterly *The National Interest* during its first four years. The period covered by this volume was a critical one for American foreign policy. It represented a recovery of confidence after the uncertainty and self-laceration of the 1960s and 1970s. But it was also a period when dramatic events in the communist world raised fundamental questions about the ending of the Cold War and about prevailing American foreign policy. The essays in this volume examine the basic and enduring questions of international politics and the national security of the United States. These and related issues are discussed in the reader by leading American policymakers, academics, and commentators. Co-published with *The National Interest* *Bulletin of the Atomic Scientists*, 1985-06 *In the National Interest* Rajiv Kumar, Santosh Kumar, 2010 **Encyclopedia of War and American Society** Peter Karsten, 2006 Publisher description *Joint Force Quarterly*, 1995 **National Security Strategy of the United States** United States. President, 1995 **Naval Law Review**, 1988 *The Oxford Handbook of the International Law of Global Security* Robin Geiß, Nils Melzer, 2021-02-16 Understanding the global security environment and delivering the necessary governance responses is a central challenge of the 21st century. On a global scale, the central regulatory tool for such responses is public international law. But what is the state role and relevance of public international law in today's complex and highly dynamic global security environment? Which concepts of security are anchored in international law? How is the global security environment shaping international law and how is international law in turn influencing other normative frameworks? The *Oxford Handbook of the International Law of Global Security* provides a ground-breaking overview of the relationship between international law and global security. It constitutes a comprehensive and systematic mapping of the various sub-fields of international law dealing with global security challenges and offers authoritative guidance on key trends and debates around the relationship between public international law and global security governance. This Handbook highlights the central role of public international law in an effective global security architecture and in doing so addresses some of the most pressing legal and policy challenges of our time. The Handbook features original contributions by leading scholars and practitioners from a wide range of professional and disciplinary backgrounds reflecting the fluidity of the concept of global security and the diversity of scholarship in this area. *New Technologies and the Law of Armed Conflict* Hitoshi Nasu, Robert McLaughlin, 2013-12-23 Modern technological development has been both rapid and fundamentally transformative of the means and methods of warfare and of the broader environment in which warfare is conducted. In many cases, technological development has been stimulated by and dedicated to addressing military requirements. On other

occasions technological developments outside the military sphere affect or inform the conduct of warfare and military expectations The introduction of new technologies such as information technology space technologies nanotechnology and robotic technologies into our civil life and into warfare is expected to influence the application and interpretation of the existing rules of the law of armed conflict In this book scholars and practitioners working in the fields critically examine the potential legal challenges arising from the use of new technologies and future directions of legal development in light of the specific characteristics and challenges each technology presents with regard to foreseeable humanitarian impacts upon the battlespace

The Present State of International Law and Other Essays Maarten Bos, 2013-11-22 In October 1873 as every Conference Report recalls the Association for the Reform and Codification of the Law of Nations was founded in Brussels Belgium At the Brussels Conference of 1895 the Association's name was changed and ever since it has been The International Law Association On August 30 and 31 and September 1 1973 a Centenary Celebration will be held in the Association's place of birth In the course of preparations made for this triduum plans were also laid by the Executive Council for a Centenary Volume to mark the event The formula adopted for the book was mostly based on contributions by Chairmen and or Rapporteurs of International Committees of the Association who were asked to shed light on the present state of their subject Hence the title of the Volume For good measure various other topics not coming under the terms of reference of International Committees were added Almost all of the authors invited responded favourably and their studies are to be found in Part II arranged in sections which have no other justification than the Editor's whim It should be pointed out that Chairmen and or Rapporteurs of International Committees wrote their articles a titre personnel and therefore cannot be deemed to express opinions held by their Committees as such Part I contains the other essays dealing with the Association itself rather than with the present state of international law
