**Civic Service Worldwide** Amanda Moore McBride, Michael

Sherraden, 2016-07-01 This comprehensive collection of the latest research and policy developments in civic service worldwide provides an informed assessment of what works and what doesn't work in the field. With contributions from some of the discipline's best known global leaders, it presents a conceptualization and operational definition of civic service that allows for variations across nations and cultures. Civic Service Worldwide offers a perspective on the history and potential for civic service from its roots in military service. It summarizes the effects of national service in diverse countries and identifies important developments in service including service across the lifespan and transnational service. The editors and contributors also address key questions and promising theoretical and methodological approaches for advancing knowledge in the field.

**National Service, Citizenship, and Political Education** Eric B. Gorham, 1992-09-01 This book analyzes the issues surrounding civilian national service policy from a fresh and original perspective. The author connects national service programs to the political theories of civic republicanism and communitarianism, assesses the practical consequences of these theories, and examines past youth service programs such as the CCC and Peace Corps to see if they are appropriate models or ideals for a national program. Gorham engages the issue of compulsory versus voluntary service and questions whether service tasks can instill a sense of citizenship in young people as defenders of the program claim. Using the work of Michel Foucault, Charles Taylor, Carole Pateman, and others, he suggests that national service as presently planned will not create the citizen so much as a post-industrial and gendered subject. In the concluding chapters, he presents an argument for a democratic national service and offers an alternative program for policymakers to consider.

**National Service Programs and Their Effects on Military Manpower and Civilian Youth Problems** United States. Congressional Budget Office, 1978

*U.S. Military Service* Cynthia A. Watson, 2007-01-08 This work is a fascinating overview of Americans' complex and occasionally uneasy relationship with military service from World War II to the age of global terrorism. The end of the Cold War ushered in a new kind of war that has already made conventional tactics and strategy obsolete. How has the U.S. military responded? In *U.S. Military Service: A Reference Handbook*, Cynthia Watson, professor of strategy at the National War College, analyzes the major issues that are reshaping the military in the era of global terrorism: problems of recruitment, urban warfare, effective use of electronic media, and rebuilding failed states. She also examines the unprecedented policy of relinquishing military duties to the for-profit sector, which has occurred in both Afghanistan and Iraq. Through a combination of detailed analysis and broad overview, the work shows how the U.S. military is quickly transforming itself into a leaner, more agile force.

**Assets and the Poor** Michael Sherraden, 2016-09-16 This work proposes a new approach to welfare: a social policy that goes beyond simple income maintenance to foster individual initiative and self-sufficiency. It argues for an asset

based policy that would create a system of saving incentives through individual development accounts IDAs for specific purposes such as college education homeownership self employment and retirement security In this way low income Americans could gain the same opportunities that middle and upper income citizens have to plan ahead set aside savings and invest in a more secure future      The Revival of Values Education in Asia & the West W. K. Cummings,S. Gopinathan,Y. Tomoda,2014-06-28 It is clear from cross national investigations that the concern with values education is universal but that national approaches to the critical questions confronting value educators are extraordinarily diverse This volume begins by examining the context of the revival of values education and asks why it is gaining new impact in national and local educational systems Chapter 2 helps to locate values education in its historical time and place The case studies presented in Chapters 3 9 provide examples of the major variations in national practice in Asia and the West and the concluding chapter identifies many of the options open to educational leaders The aim of the book is to provide both practitioners and scholars with insights into the latest developments so that they can approach their work with broader vision and compassion
