Hirschfelder, Mary Gloyne Byler, Michael Dorris, 1983 **European and Non-European Societies, 1450-1800** Robert Forster, 2019-07-15 First published in 1997 this volume looks at the process of European expansion which brought into contact societies and cultures across the world which had been initially alien to one another Conflict was one aspect of this interaction but accommodation mutual adaptation and institutional and behavioural synthesis were also present though often biased in favour of European norms The intent of this book is to avoid treating colonization dominance and exploitation as the only focuses of attention The second volume focuses on the Americas and uses the topics of religion class gender and race as its points of entry The Founders of America Francis Jennings, 1994 How Indians discovered the land pioneered in it and created great classical civilzations how they were plunged into a Dark Age by invasion and conquest and how they are now reviving American Indians and Christian Missions Henry Warner Bowden, 1985-06-15 In this absorbing history Henry Warner Bowden chronicles the encounters between native Americans and the evangelizing whites from the period of exploration and colonization to the present He writes with a balanced perspective that pleads no special case for native separatism or Christian uniqueness Ultimately he broadens our understanding of both intercultural exchanges and the continuing strength of American Indian spirituality expressed today in Christian forms as well as in revitalized folkways Bowden makes a radical departure from the traditional approach Drawing

on the theories and findings of anthropologists archaeologists and historians he presents Indian missionary relations as a series of cultural encounters the outcomes of which were determined by the content of native beliefs the structure of native religious institutions and external factors such as epidemic diseases and military conflicts as well as by the missionaries own resources and abilities The result is a provocative insightful historical essay that liberates a complex subject from the narrow perimeters of past discussions and accords it an appropriate richness and complexity For anyone with an interest in Indian missionary relations from the most casual to the most specialized this book is the place to begin Neal Salisbury Theology Today If one wishes to read a concise thought provoking ethnohistory of Indian missions 1540 1980 this is it Henry Warner Bowden's history perhaps for the first time places the sweep of Christian evangelism fully in the context of vigorous believable native religions Robert H Keller Jr American Historical Review Women, 'Race' and Writing in the Early Modern Period Margo Hendricks, Patricia Parker, 2013-08-21 Women Race and Writing in the Early Modern Period is an extraordinarily comprehensive interdisciplinary examination of one of the most neglected areas in current scholarship The contributors use literary historical anthropological and medical materials to explore an important intersection within the major era of European imperial expansion The volume looks at the conditions of women's writing and the problems of female authorship in the period the tensions between recent feminist criticism and the questions of race empire and colonialism the relationship between the early modern period and post colonial theory and recent African writing Women Race and Writing in the Early Modern Period contains ground breaking work by some of the most exciting scholars in contemporary criticism and theory It will be vital reading for anyone working or studying in the field America in 1492 Alvin M. Josephy, Jr.,1993-02-02 When Columbus landed in 1492 the New World was far from being a vast expanse of empty wilderness it was home to some seventy five million people They ranged from the Arctic to Tierra del Fuego spoke as many as two thousand different languages and lived in groups that varied from small bands of hunter gatherers to the sophisticated and dazzling empires of the Incas and Aztecs This brilliantly detailed and documented volume brings together essays by fifteen leading scholars field to present a comprehensive and richly evocative portrait of Native American life on the eve of Columbus s first landfall Developed at the D Arcy McNickle Center for the History of the American Indian and edited by award winning author Alvin M Josephy Jr America in 1492 is an invaluable work that combines the insights of historians anthropologists and students of art religion and folklore Its dozens of illustrations drawn from largely from the rare books and manuscripts housed at the Newberry Library open a window on worlds flourished in the Americas five hundred years ago Across a **Great Divide** Laura L. Scheiber, Mark D. Mitchell, 2010-02-15 Archaeological research is uniquely positioned to show how native history and native culture affected the course of colonial interaction but to do so it must transcend colonialist ideas about Native American technological and social change This book applies that insight to five hundred years of native history Using data from a wide variety of geographical temporal and cultural settings the contributors examine economic social and

political stability and transformation in indigenous societies before and after the advent of Europeans and document the diversity of native colonial experiences The book s case studies range widely from sixteenth century Florida to the Great Plains to nineteenth century coastal Alaska The contributors address a series of interlocking themes Several consider the role of indigenous agency in the processes of colonial interaction paying particular attention to gender and status Others examine the ways long standing native political economies affected and were in turn affected by colonial interaction A third group explores colonial period ethnogenesis emphasizing the emergence of new native social identities and relations after 1500 The book also highlights tensions between the detailed study of local cases and the search for global processes a recurrent theme in postcolonial research If archaeologists are to bridge the artificial divide separating history from prehistory they must overturn a whole range of colonial ideas about American Indians and their history This book shows that empirical archaeological research can help replace long standing models of indigenous culture change rooted in colonialist narratives with more nuanced multilinear models of change and play a major role in decolonizing knowledge about native peoples
