*American Indian Languages* Lyle Campbell,2000-09-21 Native American languages are spoken from Siberia to Greenland and from the Arctic to Tierra del Fuego they include the southernmost language of the world Yaghan and some of the northernmost Eskimoan Campbell s project is to take stock of what is currently known about the history of Native American languages and in the process examine the state of American Indian historical linguistics and the success and failure of its various methodologies There is remarkably little consensus in the field largely due to the 1987 publication of Language in the Americas by Joseph Greenberg He claimed to trace a historical relation between all American Indian languages of North and South America implying that

most of the Western Hemisphere was settled by a single wave of immigration from Asia This has caused intense controversy and Campbell as a leading scholar in the field intends this volume to be in part a response to Greenberg Finally Campbell demonstrates that the historical study of Native American languages has always relied on up to date methodology and theoretical assumptions and did not as is often believed lag behind the European historical linguistic tradition *American Sign Language* Charlotte Lee Baker-Shenk,Dennis Cokely,1991 The videocassettes illustrate dialogues for the text it accompanies and also provides ASL stories poems and dramatic prose for classroom use Each dialogue is presented three times to allow the student to converse with each signer Also demonstrates the grammar and structure of sign language The teacher s text on grammar and culture focuses on the use of three basic types of sentences four verb inflections locative relationships and pronouns etc by using sign language The teacher s text on curriculum and methods gives guidelines on teaching American Sign Language and Structured activities for classroom use **Indigenous Languages and the**

**Promise of Archives** Adrianna Link,Abigail Shelton,Patrick Spero,2021-05 Indigenous Languages and the Promise of Archives captures the energy and optimism that many feel about the future of community based scholarship which involves the collaboration of archives scholars and Native American communities The American Philosophical Society is exploring new applications of materials in its library to partner on collaborative projects that assist the cultural and linguistic revitalization movements within Native communities A paradigm shift is driving researchers to reckon with questionable practices used by scholars and libraries in the past to pursue documents relating to Native Americans practices that are often embedded in the content of the collections themselves The Center for Native American and Indigenous Research at the American Philosophical Society brought together this volume of historical and contemporary case studies highlighting the importance of archival materials for the revitalization of Indigenous languages Essays written by archivists historians anthropologists knowledge keepers and museum professionals cover topics critical to language revitalization work they tackle long standing debates about ownership access and control of Indigenous materials stored in repositories and they suggest strategies for how to decolonize collections in the service of community based priorities Together these essays reveal the power of collaboration for breathing new life into historical documents Sign Languages of the World Julie Bakken Jepsen,Goedele De Clerck,Sam Lutalo-Kingi,William B. McGregor,2015-10-16 Although a number of edited collections deal with either the languages of the world or the languages of particular regions or genetic families only a few cover sign languages or even include a substantial amount of information on them This handbook provides information on some 38 sign languages including basic facts about each of the languages structural aspects history and culture of the Deaf communities and history of research This information will be of interest not just to general audiences including those who are deaf but also to linguists and students of linguistics By providing information on sign languages in a manner accessible to a less specialist audience this volume fills an important gap in the literature *Simplified Signs: A Manual Sign-Communication System for Special*

*Populations, Volume 1.* John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike
