## **Nato And Weapons Of Mass Destruction Regional Alliance Goba Threats:**

**NATO and Weapons of Mass Destruction** Eric Terzuolo, 2009-05-07 NATO was hugely successful in facing off the Soviet Union during the Cold War But has it been equally successful in addressing the new threats of the post Cold War era This new study assesses the organization s political and military initiatives and how its outreach to Russia Ukraine and other countries in the Euro Atlantic and Mediterranean regions devoted considerable attention to WMD proliferation risks It also probes the political factors both inside and outside NATO as well as resource constraints which have limited the alliance s added value in the international community s effort to combat proliferation The events of 11 September 2001 and bitter intra alliance controversy over the 2003 Iraq intervention have highlighted questions regarding NATO s future role and even its continued viability This is a serious reflection on how the alliance should figure in the fight against WMD and terrorist threats and an examination of today s key issues including the use of force in international relations and the possibility of constructing new post Cold War collective security rules This is the first study to evaluate critically and in depth how a long standing security organization has adapted and must continue to adapt to the global security challenges of our time This book will be of great interest to all students and scholars of international politics military history and all readers interested in the future of NATO and international security

**Theoretical Roots of US Foreign Policy** Thomas M. Kane, 2006-09-27 This volume explores the reasons why American leaders from the 1700s onwards frequently adopt policies of unilateralism Thomas M Kane presents fresh explanations for America s invasion of Iraq and defiance of international agreements which go much deeper than conventional critiques of particular presidents to examine the real significance of the September 11 attacks As the only and unprecedented sole superpower the US faces a range of new and complex problems Kane draws on the thinking of Machiavelli to illuminate and assess the key challenges for both the US and the global community This unique book connects contemporary US policy to patterns that reach back to America s founding explores political dynamics affecting all republics contributes to theoretical debates about the benevolence or otherwise of American democracy highlights the key issues that Americans and non Americans alike must address now and in the future Theoretical Roots of US Foreign Policy will be of great interest to all students of US foreign policy strategy and history and of international relations politics and strategic studies in general

*Transatlantic Relations in the 21st Century* Erwan Lagadec, 2012 This book offers an overview of the interface between European integration transatlantic relations and the rise of the rest in the early 21st century The collapse of the Soviet bloc opened up an era in which the drivers and perceived benefits of the US alliance among European countries have become more variegated and shifting The proposition that the US remains at once an indispensable and intolerable nation in Europe is a key concept in the alliance as the US remains inextricably tied to the continent through economic military and cultural links This work examines this complex subject area from many angles including an analysis of the historical and cultural contexts of America s relations with Europe as well as a discussion of the

politics of transatlantic affairs which utilises evidence gleaned from a series of case studies In the concluding chapters the author assesses the likelihood that the West can entrench its global dominance in the realms of soft and hard power and by effecting a controlled reform that will see multilateral structures open up to emerging powers This book will be of great interest to students of European Politics EU integration transatlantic relations US foreign policy diplomacy International Security and IR in general      **Vietnam in Iraq** David Ryan, John Dumbrell, 2007-01-24 The essays in this book offer a series of perspectives on connections and parallels between the Vietnam War and the 2003 invasion of and current conflict in Iraq

*Transforming European Militaries* Gordon Adams, Guy Ben-Ari, 2006-09-27 This new book examines European Network Enabled Capabilities and their implications for transatlantic interoperability in future coalition operations with the US

**European Security in the Twenty-First Century** Adrian Hyde-Price, 2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy European Security in the Twenty First Century will appeal to students and scholars of international relations European politics and security studies      Truth Recovery and Transitional Justice Iosif Kovras, 2014-05-16 This book investigates why some societies defer transitional justice issues after successful democratic consolidation Despite democratisation the exhumation of mass graves containing the victims from the violence in Cyprus 1963 1974 and the Spanish civil war 1936 1939 was delayed until the early 2000s when both countries suddenly decided to revisit the past Although this contradicts the actions of other countries such as South Africa Bosnia and Guatemala where truth recovery for disappeared missing persons was a central element of the transition to peace and democracy Cyprus and Spain are not alone this is an increasing trend among countries trying to come to terms with past violence Truth Recovery and Transitional Justice considers the case studies of Spain and Cyprus and explores three interrelated issues First the book examines which factors can explain prolonged silence on the issue of missing persons in transitional settings It then goes on to explore the transformation of victims groups from opponents of truth recovery to vocal pro reconciliation pressure groups and examines the circumstances in which it is better to tie victims rights to an overall political settlement Finally the author goes on to compare Spain and Cyprus with Greece a country that remains resistant to post transitional justice norms This book will be of interest to students of transitional justice human rights peace and conflict studies and security studies in general      **Military Transformation and Strategy** Bernard Loo, 2008-08-21 This book

explores the idea of a revolution in military affairs RMA which underpins the transformational agenda of the US military and examines its implications for smaller states The strategic studies literature on the RMA tends to be American centric and directed towards the strategic problems of the US military This volume seeks to fill the gap in the literature and establish an intellectual framework that can assist other smaller powers in their respective approaches to this issue The book does so in three main sections Part I focuses on questions of transformations in strategy and war Part II explores transformations in operations while Part III examines possible impediments to an RMA This book will be of much interest to students of Military Studies Asian Studies Strategic Studies and International Relations in general *Explaining War and Peace* Jack Levy, Gary Goertz, 2007-06-18 This edited volume focuses on the use of necessary condition counterfactuals in explaining two key events in twentieth century history the origins of the First World War and the end of the Cold War Containing essays by leading figures in the field this book analyzes the causal logics of necessary and sufficient conditions demonstrates the variety of different ways in which necessary condition counterfactuals are used to explain the causes of individual events and identifies errors commonly made in applying this form of causal logic to individual events It includes discussions of causal chains contingency critical junctures and powder keg explanations and the role of necessary conditions in each *Explaining War and Peace* will be of great interest to students of qualitative analysis the First World War the Cold War international history and international relations theory in general **Propaganda and Information Warfare in the Twenty-First Century** Scot Macdonald, 2006-12-05 This is the first book to analyze how the technology to alter images and rapidly distribute them can be used for propaganda and to support deception operations In the past propagandists and those seeking to conduct deception operations used crude methods to alter images of real people events and objects which could usually be detected relatively easily Today however computers allow propagandists to create any imaginable image still or moving with appropriate accompanying audio Furthermore it is becoming extremely difficult to detect that an image has been manipulated and the Internet television and global media make it possible to disseminate altered images around the world almost instantaneously Given that the United States is the sole superpower few if any adversaries will attempt to fight the US military conventionally on the battlefield Therefore adversaries will use propaganda and deception especially altered images in an attempt to level the battlefield or to win a war against the United States without even having to fight militarily *Propaganda and Information Warfare in the 21st Century* will be of great interest to students of information war propaganda public diplomacy and security studies in general **Europeanization of National Security Identity** Pernille Rieker, 2006-05-09 This new book tackles two key questions 1 How is the EU functioning as a security actor 2 How and to what extent is the EU affecting national security identities Focusing on the four largest Nordic states Denmark Finland Norway and Sweden this incisive study analyzes how and to what extent the EU affects national security identities It shows how the EU has developed into a special kind of security actor that due to its level of political integration has an important influence on national security

approaches and identities This new analysis applies a fresh combination of integration theory security studies and studies of Europeanization The main argument in this book is that rather than adapting to the changing conditions created by the end of the Cold War the Nordic states changed their security approaches in response to the European integration process It shows how different phases in the post Cold War European integration process have influenced the national security approaches of Sweden Finland Denmark and Norway While all four security approaches seem to have been Europeanized the speed and the character of these changes seem to vary due to a combination of differing ties to the EU and differing security policy traditions This new book will be of great interest to all students of European Defence national security and of security studies in general *Conflict Prevention and Peace-building in Post-War Societies* T. David Mason, James D.

Meernik, 2006-05-02 This volume provides an overview of the costs benefits consequences and prospects for rebuilding nations emerging from violent conflict The rationale for this comes from the growing realization that in the post Cold War era and in the aftermath of 9 11 our understanding of conflict and conflict resolution has to include consideration of the conditions conducive to sustaining the peace in nations torn by civil war or interstate conflict The chapters analyze the prospects for building a sustainable peace from a number of different perspectives examining the role of economic development democratization respect for human rights the potential for renewal of conflict the United Nations and other critical topics In an age when nation building is once again on the international agenda and scholars as well as policy makers realize both the tremendous costs and benefits in fostering developed democratic peaceful and secure nations the time has truly come for a book that integrates all the facets of this important subject *Conflict Prevention and Peace building in Post War Societies* will appeal to students and scholars of peace studies international relations security studies and conflict resolution as well as policy makers and analysts **Military Forces in 21st Century Peace Operations** James V.

Arbuckle, 2006-09-27 A major new study of the realities of contemporary warfare which presents a range of fresh insights and is essential reading for all students and professionals engaged in the field This book clearly shows us that neither military nor civilian agencies can act effectively alone in resolving modern conflicts joint civil military efforts are needed and those efforts must be deliberately planned from the outset of an operation they cannot be added on as afterthoughts when all else has failed the record of our efforts over nearly a decade and a half since the end of the Cold War demonstrates that we are doing badly at creating civil military partnerships and that we are not getting better James V Arbuckle shows how these issues are neither structural nor organizational they are cultural They involve attitudes beliefs perceptions positive and negative true and false The solutions will involve changing attitudes moving beyond prejudices replacing competition with cooperation The principal mechanisms for this will be common civil military training and education Women and Political Violence Miranda Alison, 2009-01-21 This book directly challenges the stereotype that women are inherently peaceable by examining female combatants involvement in ethno national conflicts Drawing upon empirical case studies of Sri Lanka and Northern Ireland

this study explores the ways in which women have traditionally been depicted Whereas women have predominantly been seen as victims of conflict this book acknowledges the reality of women as active combatants Indeed female soldiers irregulars are features of most modern conflicts and particularly in ethno nationalist violence until now largely ignored by mainstream scholarship Original interview material from the author s extensive fieldwork addresses why and how some women choose to become violently engaged in nationalist conflicts It also highlights the personal political costs and benefits incurred by such women This book provides a valuable insight into female combatants and is a significant contribution to the literature This book will be of great interest to students of political violence ethnic conflict gender studies and international relations in general

**Understanding Victory and Defeat in Contemporary War** Jan Angstrom, Isabelle

Duyvesteyn, 2006-12-05 Bringing together leading contributors in the field this new volume analyzes how victory and defeat in modern war can be understood and explained It does so by confronting two inter related research problems the nature of victory and defeat in modern war and the explanations of victory and defeat By first questioning the extent to which the concepts of victory and defeat are meaningful to describe the outcomes of modern wars and whether the contents of these concepts are changing it then evaluates different theories purporting to explain the outcomes of war and the impact of variables ranging from technology to culture The book tackles several key questions What is the definition of victory in the War on Terror What is the meaning of victory and defeat in contemporary insurgencies such as those in Iraq and Afghanistan Are the counterstrategies that were developed in the mid twentieth century valid in order to deal with present and future conflicts With case studies ranging from the Malayan Emergency to the current conflict in Iraq Understanding Victory and Defeat in Contemporary War will be of great interest to students of war and conflict studies security studies military history and international relations

**Militancy and Violence in West Africa** James Gow, Funmi Olonisakin, Ernst

Dijxhoorn, 2013-07-18 This volume provides a systematic and cross regional analysis of radicalisation militancy and violence in West Africa Concern about terrorism in or from West Africa has been recognised in academic research and the adoption of militarised approaches to addressing it questioned However the basis for that questioning the need to investigate factors such as the historical and socio economic roots of militancy is not developed nor is it substantiated in existing studies The significant impact of religiously motivated radicalisation and violence in West Africa upon international security makes it essential to understand the issues of militancy and violence in the region In this volume the authors draw upon empirical research in West Africa to develop understanding in these areas Over the course of several chapters written by leading experts in the field the book successfully blends historical and conceptual analysis with new empirical research gathered from focus group discussions and research interviews Each of these core studies is structured around five interrelated issues tracing the antecedents of radicalisation monitoring trends identifying actors anticipating possibilities and analysing the strength of existing preventive mechanisms This book will be of much interest to students of African security African politics

radicalisation political Islam war and conflict studies and security studies in general      *Reconstructing Afghanistan* William Maley, Susanne Schmeidl, 2014-11-27 This book identifies some of the main lessons for civil military interactions that can be derived from the experiences of Provincial Reconstruction Teams PRTs in Afghanistan The book has three main themes Firstly the volume analyses why the ways in which civil and military actors interact in theatres of operations such as Afghanistan matter for both those categories of actors and for the ordinary people who their interactions serve Second the book highlights that these interactions are invariably complex The third theme which arises specifically from the PRT experience in Afghanistan is that such teams vary significantly in their roles resourcing and operational environments Consequently to appraise the value of the PRT experience it is necessary to unpack the experiences of different PRTs which the use of case studies allows one to do The volume comprises an introduction identifying some key questions to which the PRT experience gives rise and case studies of the experiences of the United States United Kingdom New Zealand Canada The Netherlands Australia Germany and France chapters dealing with the roles played by NGOs and the UN system and a discussion from an Afghan perspective of the implications of civilian casualties It is the combination of the diverse cases discussed in this book with a focus on the broad challenges of optimising civil military interactions that makes this book distinctive This book will be of much interest to students of the Afghan War civil military relations statebuilding Central Asian politics and IR in general      **Clinton's Foreign Policy** John Dumbrell, 2009-04-02 This volume is a detailed account of President Clinton's foreign policy during 1992-2000 covering the main substantive issues of his administration including Iraq Bosnia and Kosovo The book emphasizes Clinton's adaptation of the elder Bush's New World Order outlook and his relationship to the younger Bush's Americanistic foreign policy In doing so it discusses in detail such key policy areas as foreign economic policy humanitarian interventionism policy towards Russia and China and towards European and other allies defence priorities international terrorism and peacemaking Overall the author judges that Clinton managed to develop an American foreign policy approach that was appropriate for the domestic and international conditions of the post Cold War era This book will be of great interest to students of Clinton's administration US foreign policy international security and IR in general John Dumbrell is Professor of Government at Durham University He specialises in the study of US foreign policy

Ethics and the Laws of War Antony Lamb, 2013-05-29 This book is an examination of the permissions prohibitions and obligations found in just war theory and the moral grounds for laws concerning war Pronouncing an action or course of actions to be prohibited permitted or obligatory by just war theory does not thereby establish the moral grounds of that prohibition permission or obligation nor does such a pronouncement have sufficient persuasive force to govern actions in the public arena So what are the moral grounds of laws concerning war and what ought these laws to be Adopting the distinction between jus ad bellum and jus in bello the author argues that rules governing conduct in war can be morally grounded in a form of rule consequentialism of negative duties Looking towards the public rules the book argues for a new interpretation of

existing laws and in some cases the implementation of completely new laws These include recognising rights of encompassing groups to necessary self defence recognising a duty to rescue and considering all persons neither in uniform nor bearing arms as civilians and therefore fully immune from attack thus ruling out targeted or named killings This book will be of much interest to students of just war theory ethics of war international law peace and conflict studies and Security Studies IR in general Bosnian Security After Dayton Michael A. Innes, 2006-09-27 Featuring fresh contributions from leading scholars this new volume considers a varied range of post war post Dayton and post 9 11 problems and issues reminding readers that Dayton is not the only challenge to the safety stability and long term viability of the post war Bosnian state Drawing together all the latest research this book covers new ground in its discussion of post 9 11 security concerns and in its leading edge analyses of crime corruption and terror in a transitional state It takes Bosnia Herzegovina seriously as a subject of regional and international affairs and is a critically important contribution to scholarship showing how redefined global security concerns have heavily altered international and domestic security priorities in Bosnia Herzegovina with corresponding implications for post war justice and identity politics foreign intervention and state level institution building This is essential reading for scholars of the Balkans peacebuilding and reconstruction European politics and of security studies in general
