S. B. Ryholt, Adam Bülow-Jacobsen, 1997 The Second Intermediate Period designates the 250 year period 1800-1550 BC which separates the two glorious periods of the Middle Kingdom and the New Kingdom During the 19th century BC an invasion by Canaanite tribes into the Delta took place Around 1800 BC these people proclaimed their own king and the Delta thus became independent from the rest of Egypt Egypt remained split between the Canaanitic rulers in North and the native Egyptian Kings in the South for the rest of the Second Intermediate Period The division of Egypt brought about an economic decline and the entire period is characterized by a lack of royal monuments This circumstance has greatly hampered any attempts to establish a chronology of the period and as a consequence it has been very difficult to date many sources which are relevant for the social and political situation of the period The Second Intermediate Period has therefore remained one of the most obscure periods of Egypt's ancient history The dissertation is a new attempt to establish a chronology for the Second Intermediate Period and define the different kingdoms their territories and political relations The study consists of four main chapters three appendixes a catalogue of sources bibliography and indices Included is a catalogue of all the historical sources about 1500 known to certify the names of the Egyptian kings of the Second Intermediate Period Each source is described in terms of type origin and present location followed by bibliographical references *Supplement to The Pre-Islamic Coinage of Eastern Arabia* Daniel T. Potts, 1994 This is a supplement to a presentation of the various indigenous coin issues that circulated in Eastern Arabia during the pre Islamic era as attested in five private collections studied by the author in *The Pre Islamic Coinage of Eastern Arabia* **Studies in Zoroastrian Family Law** Bodil Hjerrild, 2003 The source material of the book is translated from the only existent Sasanian law text and two Rivyats from the first half of the ninth and the first half of the tenth century at which time the Zoroastrians survived only in minority communities The original text is presented in photocopy with a transcription The analysis is concerned with four institutions in the sphere of family law Guardianship marriage of levirate marriage of a woman in order to provide her father or brother with an heir and marriage between close relatives incest taboo did not exist The issue of the research is to show how the social conditions and internal family economy with its power balance is reflected in the rules of the Sasanian law and that the differences apparent in the later texts are not accidental but form a pattern caused by the changing social conditions and that the law was changed in order to help preserve the Zoroastrian minority in adversity under Arab rule

Incestuous and Close-kin Marriage in Ancient Egypt and Persia Paul John Frandsen,2009 For both ancient Egypt and Iran as a cultural feature incestuous relationships are usually dismissed on the grounds that they are only found as the exception being allowed for royalty as representatives for the divine on earth or that the evidence for such relationships are unreliable Neither view from the perspective of this study is tenable This work examines the evidence for marriage and sexual relations between siblings and between a parent and child in ancient Egypt and pre Islamic Iran The book restricts its examination to incestuous relationships between members of non royal nuclear families and puts forth arguments against the generally held axiom that the prohibition of incest is a universal phenomenon

Sexual Revolutions Jane Peterson,2002-09-18 The change from a hunting gathering lifestyle to one dependent upon farming constitutes a truly revolutionary event in the human career Most archaeologists agree that how ancient people organized their work and family groups was crucial to the success of early attempts at farming Yet little serious attention has been paid to the social organization of labor in the prehistoric past This book addresses that lacuna by investigating sexual divisions of labor As a case study Peterson chose the southern Levant of West Asia where the world s first farming societies emerged some 10 000 years ago Shattering long held assumptions about women s work that lead to generalizations about gender roles Peterson shows that gender studies can be both scientific and thoroughly grounded in feminist theory

Culture History and Convergent Evolution Huw S. Groucutt,2020-07-23 This volume brings together diverse contributions from leading archaeologists and paleoanthropologists covering various spatial and temporal periods to

distinguish convergent evolution from cultural transmission in order to see if we can discover ancient human populations. With a focus on lithic technology the book analyzes ancient materials and cultures to systematically explore the theoretical and physical aspects of culture convergence and populations in human evolution and prehistory. The book will be of interest to academics, students and researchers in archaeology, paleoanthropology, genetics and paleontology. The book begins by addressing early prehistory, discussing the convergent evolution of behaviors and the diverse ecological conditions driving the success of different evolutionary paths. Chapters discuss these topics and technology in the context of the Lower Paleolithic, Earlier Stone Age and Middle Paleolithic/Middle Stone Age. The book then moves towards a focus on the prehistory of our species over the last 40,000 years. Topics covered include the human evolutionary and dispersal consequences of the Middle/Upper Paleolithic Transition in Western Eurasia. Readers will also learn about the cultural convergences and divergences that occurred during the Terminal Pleistocene and Holocene, such as the budding of human societies in the Americas. The book concludes by integrating these various perspectives and theories and explores different methods of analysis to link technological developments and cultural convergence. Association for Field Archaeology, 1997. *The Neolithic Revolution in the Near East* Alan H. Simmons, 2011-04-15. One of humanity's most important milestones was the transition from hunting and gathering to food production and permanent village life. This Neolithic Revolution first occurred in the Near East, changing the way humans interacted with their environment and each other, setting the stage ultimately for the modern world. Based on more than thirty years of fieldwork, this timely volume examines the Neolithic Revolution in the Levantine Near East and the Mediterranean island of Cyprus. Alan H. Simmons explores recent research regarding the emergence of Neolithic populations using both environmental and theoretical contexts and incorporates specific case studies based on his own excavations. In clear and graceful prose, Simmons traces chronological and regional differences within this land of immense environmental contrasts: woodland, steppe and desert. He argues that the Neolithic Revolution can be seen in a variety of economic, demographic and social guises and that it lacked a single common stimulus. Each chapter includes sections on history, terminology, geographic range, specific domesticated species, the composition of early villages and households and the development of social, symbolic and religious behavior. Most chapters include at least one case study and conclude with a concise summary. In addition, Simmons presents a unique chapter on the island of Cyprus where intriguing new research challenges assumptions about the impact and extent of the Neolithic. *The Neolithic Revolution in the Near East* conveys the diversity of our Neolithic ancestors, providing a better understanding of the period and the new social order that arose because of it. This insightful volume will be especially useful to Near Eastern scholars and to students of archaeology and the origins of agriculture.
