Helping? Gillian Berry, 2025-05-14 This book exists to encourage helping professionals particularly those at the beginning of their careers to critically explore and understand current strategies in fields such as psychotherapy psychology and social work Historical examples of helping policies and strategies used over the years are reviewed and critically evaluated as to whether they helped or hurt the communities they were designed to support Current policies will be discussed to evaluate whether they are helping the communities they serve In alignment with an Indigenous African centered philosophy of holism multi dimensionality and interconnectedness this work takes a multilayered approach to storytelling by weaving together three journeys the author's personal journey of exploration the journey of the Black Girl from George Bernard Shaw's novella described below and the reader's In it the author details her understanding of the philosophical framework she learned in professional helping training programs why she came to believe they were inadequate and how this sparked her global search to understand how to be an effective helper The author's journey is paralleled with the famous and controversial novella by George Bernard Shaw The Adventures of the Black Girl in Her Search for God which is a depiction of the universal search for understanding This text contrasts this alternative perspective on helping with the dominant approaches to what constitutes helping The protagonist's journey is mirrored by the author's stories of discovery and reflective questions are designed to enable the reader's journey toward becoming a professional helper in the context of current systems This text explores what helping may look like from an alternative philosophical perspective seeking to facilitate a process that will enable people to live more satisfyingly Each chapter offers theoretical underpinnings from an Indigenous African centered perspective a critique of dominant approaches to helping and a different stage of the Black Girl and author's paralleled searches for understanding about God and healing respectively **Head Games** Nikitah Okembe-RA Imani, 2010-12-18 Head Games is focused on the way in which ethnocentrism and cultural bias can impact public health and in this case psychotherapeutic process It examines a family therapy program being run by a major public university tied to the criminal justice system and the educational establishment aiming to reform perceived dysfunctionality in homes of the patients subjects What follows is a tragic comedy of errors in which theory and practice normed in one sociocultural context is applied or more appropriately misapplied This book questions whether we have come as far as we think in the US in terms of

calibrating our mental health systems for multicultural sensitivity and perhaps suggests there are limits to how much we can engage in cross cultural therapy The book uses an Africa centered theoretical framework to tease out these systemic incongruities and will hopefully provide guidance for counselors researchers and those more generally interested in programmatic evaluation research across cultural lines The title Head Games is an apt metaphor for the manipulation of the program by all of its participants for the purpose of reifying or resisting its inherent definitions of abnormality
