Primitives and the Supernatural, by Lucien Lévy-Bruhl. Authorized Translation by Lilian A. Clare Lucien Lévy-Bruhl, Lilian A. Clare (tr), 1935 Society and Nature Hans Kelsen, 2009 The influential jurist Hans Kelsen 1881 1973 here applies his concept of the distinction between society and nature He shows how primitive man developed his interpretation of nature through the laws of retribution and of causality to a modern concept of nature and society He holds that the gradual emancipation of the law of causality from the principle of retribution is the emancipation from a social interpretation of nature The process shows a relation between social and natural science which is very important from the point of view of intellectual history Introduction p viii Extensively annotated Kelsen is known for his theory of pure positive law as postulated in General Theory of Law and State which is also available in a reprint edition from The Lawbook Exchange

Dystopia Gregory Claeys, 2016-11-17 Dystopia A Natural History is the first monograph devoted to the concept of dystopia Taking the term to encompass both a literary tradition of satirical works mostly on totalitarianism as well as real despotisms and societies in a state of disastrous collapse this volume redefines the central concepts and the chronology of the genre and offers a paradigm shifting understanding of the subject Part One assesses the theory and prehistory of dystopia By contrast to utopia conceived as promoting an ideal of friendship defined as enhanced sociability dystopia is defined by estrangement fear and the proliferation of enemy categories A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms The work of Le Bon Freud and others is used to show how dystopian groups use such emotions Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity The prehistory of the process whereby enemies are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy Part Two surveys the major dystopian moments in twentieth century despotisms focussing in particular upon Nazi Germany Stalinism the Chinese Cultural Revolution and Cambodia under Pol Pot The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular Part Three examines literary dystopias It commences well before the usual starting point in the secondary literature in anti-Jacobin writings of the 1790s Two chapters address the main twentieth century texts usually studied as representative of the genre Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-Four The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present

How French Moderns Think Frédéric Keck, 2024-04-17 This book traces the contributions of the Lévy Bruhl family to social and political thought and expertise in 20th century France shaping the anticipation of economic and health crises How French Moderns Think tells the story of the French sociological tradition through four generations of the Lévy Bruhl family Lucien who founded the Institute of Ethnology at the University of Paris his son Henri who founded the Institute of Roman Law his grandson Raymond who took part in the creation of the National Institute of Statistics and Economic Studies and his great grandson Daniel a vaccine specialist at the Institute of Public Health This family history casts a new light on the philosophical debates about primitive mentality and the savage mind By drawing on the expert knowledge inherent in this family genealogy the articulation between the logical and the pre logical is not a cognitive question but rather a problem of anticipating unpredictable events By relating Lévy Bruhl's engagements from the Dreyfus Affair to the Minister of Armaments during the First World War Keck narrates the confrontation of the socialist ideal of justice and truth with the French colonial experience and its transformations in global technologies preparing for pandemics

A Short History of Medicine Erwin H. Ackerknecht, 2016-05-01 A bestselling history of medicine enriched with a new foreword concluding essay and bibliographic

essay Erwin H Ackerknecht's *A Short History of Medicine* is a concise narrative long appreciated by students in the history of medicine, medical students, historians, and medical professionals as well as all those seeking to understand the history of medicine. Covering the broad sweep of discoveries from parasitic worms to bacilli and x-rays and highlighting physicians and scientists from Hippocrates and Galen to Pasteur, Koch, and Roentgen, Ackerknecht narrates Western and Eastern civilization's work at identifying and curing disease. He follows these discoveries from the library to the bedside, hospital, and laboratory, illuminating how basic biological sciences interacted with clinical practice over time. But his story is more than one of laudable scientific and therapeutic achievement. Ackerknecht also points toward the social, ecological, economic, and political conditions that shape the incidence of disease. Improvements in health, Ackerknecht argues, depend on more than laboratory knowledge; they also require that we improve the lives of ordinary men and women by altering social conditions such as poverty and hunger. This revised and expanded edition includes a new foreword and concluding biographical essay by Charles E. Rosenberg, Ackerknecht's former student and a distinguished historian of medicine. A new bibliographic essay by Lisa Haushofer explores recent scholarship in the history of medicine.
