

ETHICS (PSYCHOLOGY)

Ethics in psychology refers to the moral principles and values that guide the behavior of psychologists while conducting research or providing therapy to clients.

OVERVIEW

In psychology, ethics pertains to the rules and guidelines established by the organization of psychologists and the ethical and lawful duties that scientists and practitioners owe to the people or patients they work with.

Psychologists use methods that guarantee human dignity, privacy rights, and confidentiality when conducting research, teaching, and practice following specific principles.

EXAMPLES

- **Withdrawal Rights:** Clients have the right to stop therapy at any time without facing the consequences related to breach or forfeit of confidentiality.
- **Informed Consent:** Ethical psychologists always obtain informed consent from their clients before embarking on any research, therapy, or other type of professional intervention.
