from the illness Women today are in a situation where both the monetary and human effects of stress take their toll as women face unprecedented pressures in accommodating the demands of home and career and personal family stresses that often result In addition to this while women are prone to the same stressors as men they are confronted with potentially unique physical and psychological stressors of their own They may also become stress carriers as in the abusive husband and unfair boss relationship Ironically despite these differences women live longer than men although collectively they are reported to have more symptoms illnesses intake of drugs and doctor hospital visits This outstanding new book by a pioneer in stress research presents an essential analysis of this increasingly relevant subject Stress Education for College Students James H.
