## **Refaire La Republique Andre Tardieu:**

Pluralism and the Idea of the Republic in France Julian Wright, 2012-06-12 The idea of the centralized State has played a powerful role in shaping French republicanism But for two hundred years many have tried to find other ways of being French and Republican These essays challenge the traditional account bringing together new insights from leading scholars **The Right in France from the Third Republic to Vichy** Kevin Passmore, 2013 Provides a new history of parliamentary conservatism and the extreme right in France during the successive crises of the years from 1870 to 1945 Charts royalist opposition to the newly established Republic the emergence of the nationalist extreme right in the 1890s and the parallel development of republican conservatism **Hendrik de Man and Social Democracy** Tommaso Milani, 2020-06-15 The book investigates the intellectual and political trajectory of the Belgian theorist Hendrik de Man 1885 1953 by examining the impact that his works and activism had on Western European social democracy between the two world wars Based on multinational archival research the book highlights how the idea of economic planning became part of a wider effort to address an ideological crisis within the socialist movement and revitalise the latter amidst the Great Depression A heavily controversial figure also because of his subsequent involvement in Belgian wartime collaboration de Man played a pivotal role in challenging traditional Marxist assumptions about the role of the state under capitalism and in promoting transnational exchanges between unorthodox social democrats across Europe Starting from de Man s experience in World War I the book analyses his departure from Marxism his elaboration of an alternative social democratic paradigm his entry in Belgian politics as well as the reception of his thought in France and Britain **French Presidentialism and the Election of 1995** Lorna Milne, John Gaffney, 2018-12-21 First published in 1997 this volume examines the presidential elections one of the central events of the democratic process in France and arguably the main organising principle of French politics since 1962 provide an opportunity to assess the development of the regime More significantly they allow us to assess modifications to the office of president and to French Presidentialism which are both reflected in and affected by the electoral campaign and the elections themselves This book provides such an assessment with specific reference to the candidates issues and events of the 1995 Presidential elections *The Inverted Mirror* Michael Nolan, 2006-09-01 It is hard to imagine nowadays that for many years France and Germany considered each other as arch enemies And yet for well over a century these two countries waged verbal and ultimately violent wars against each other This study explores a particularly virulent phase during which each of these two nations projected certain assumptions about national character onto the other distorted images motivated by antipathy fear and envy which contributed to the growing hostility between the two countries in the years before the First World War Most remarkably as the author discovered the qualities each country ascribed to its chief adversary appeared to be exaggerated or negative versions of precisely those qualities that it perceived to be lacking or inadequate in itself Moreover banishing undesirable traits and projecting them onto another people was also an essential step in the

consolidation of national identity As such it established a pattern that has become all too familiar to students of nationalism and xenophobia in recent decades This study shows that antagonism between states is not a fact of nature but socially constructed

1931 Tobias Straumann, 2020 Germany's financial collapse in the summer of 1931 was one of the biggest economic catastrophes of modern history It led to a global panic brought down the international monetary system and turned a worldwide recession into a prolonged depression The German crisis also contributed decisively to the rise of Hitler Soon after the crisis the Nazi Party became the largest party of the country which paved the way for Hitler's eventual seizure of power in 1933 The reason for the financial collapse was Germany's large pile of foreign debt denominated in gold currency which condemned the government to cut spending raise taxes and lower wages in the middle of a worldwide recession As the political resistance to this austerity policy grew the German government began to question its debt obligations prompting foreign investors to panic and sell their German assets The resulting currency crisis led to the failure of the already weakened banking system and a partial sovereign default Hitler managed to profit from the crisis because he had been the most vocal critic of the reparation regime As the financial system collapsed his relentless attacks against foreign creditors and the alleged complicity of the German government resonated more than ever with the electorate Sadly enough Germany's creditors hesitated too long to take the wind out of Hitler's sails by offering debt relief In 1931 Tobias Straumann reveals the story of the fatal crisis demonstrating how a debt trap contributed to the rapid financial and political collapse of a European country and to the rise of the Nazi Party
