Refinement Calculus A Systematic Introduction:

   Refinement Calculus Ralph-Johan Back,Joakim Wright,1998-04-13 Much current research in computer science is concerned with two questions is a program correct And how can we improve a correct program preserving correctness This latter question is known as the refinement of programs and the purpose of this book is to consider these questions in a formal setting In fact correctness turns out to be a special case of refinement and so the focus is on refinement Although a reasonable background knowledge is assumed from mathematics and CS the book is a self contained introduction suitable for graduate students and researchers coming to this subject for the first time There are numerous exercises provided of varying degrees of challenge   Formal Methods for Components and Objects Frank S. de Boer,Marcello M. Bonsangue,Stefan Hallerstede,Michael Leuschel,2010-11-11 All modern industries rely on large and complex software systems In order to construct such large systems in a systematic manner the focus of the development methodologies has switched in the last two decades from functional to structural issues Formal methods have been applied successfully to the verification of medium sized programs in protocol and hardware design However their application to the development of large systems requires a greater emphasis on specification modeling and validation techniques supporting the concepts of reusability and modifiability and their implementation in new extensions of existing programming languages like Java This state of the art survey presents the outcome of the 8th Symposium on Formal Methods for Components and Objects held in Eindhoven The Netherlands in November 2009 The volume contains 17 revised contributions submitted after the symposium by speakers from each of the following European IST projects the IST FP6 project BIONETS on biologically inspired services evolution for the pervasive age the IST FP7 project COMPAS on compliance driven models languages and architectures for services the IST FP6 project CREDO on modelling and analysis of evolutionary structures for distributed services the IST FP7 DEPLOY on industrial deployment of advanced system engineering methods for high productivity and dependability the IST FP7 project HATS on highly adaptable and trustworthy software using formal methods the IST FP7 project INESS on integrated European railway signalling system the IST FP7 project MOGENTES on model based generation of tests for dependable embedded systems the IST FP6 project PROTEST on property based testing and the IST FP7 project QUASIMODO on quantitative system properties in model driven design of embedded systems   **Typed Lambda Calculi and Applications** Simona Ronchi Della Rocca,2007-07-11 This book constitutes the refereed proceedings of the 8th International Conference on Typed Lambda Calculi and Applications TLCA 2007 held in Paris France in June 2007 in conjunction with RTA 2007 the 18th International Conference on Rewriting Techniques and Applications as part of RDP 2007 the 4th International Conference on Rewriting Deduction and Programming The 25 revised full papers presented together with 2 invited talks were carefully reviewed and selected from 52 submissions The papers present original research results that are broadly relevant to the theory and applications of typed calculi and address a wide variety of topics such as proof theory semantics

Tenhunen,J. Isoaho,Axel Jantsch,2006-03-20 In Interconnect centric Design for Advanced SoC and NoC we have tried to create a comprehensive understanding about on chip interconnect characteristics design methodologies layered views on different abstraction levels and finally about applying the interconnect centric design in system on chip design Traditionally on chip communication design has been done using rather ad hoc and informal approaches that fail to meet some of the challenges posed by next generation SOC designs such as performance and throughput power and energy reliability predictability synchronization and management of concurrency To address these challenges it is critical to take a global view of the communication problem and decompose it along lines that make it more tractable We believe that a layered approach similar to that defined by the communication networks community should also be used for on chip communication design The design issues are handled on physical and circuit layer logic and architecture layer and from system design methodology and tools point of view Formal communication modeling and refinement is used to bridge the communication layers and network

centric modeling of multiprocessor on chip networks and socket based design will serve the development of platforms for SoC and NoC integration Interconnect centric Design for Advanced SoC and NoC is concluded by two application examples interconnect and memory organization in SoCs for advanced set top boxes and TV and a case study in NoC platform design for more generic applications **FM 2009: Formal Methods** Ana Cavalcanti,Dennis Dams,2009-10-26 th FM 2009 the 16 International Symposium on Formal Methods marked the 10th an versary of the First World Congress on Formal Methods that was held in 1999 in Toulouse France We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series aiming to once again bring together the formal methods communities from all over the world The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members as well as of the authors of submitted and accepted papers Novel this year was a special track on tools and industrial applications Subm sions of papers on these topics were especially encouraged but not given any special treatment It was just as hard to get a special track paper accepted as any other paper What we did promote however was a discussion of how originality contri tion and soundness should be judged for these papers The following questions were used by our Programme Committee **Theoretical Aspects of Computing – ICTAC 2014** Gabriel Ciobanu,Dominique Méry,2014-09-11 This book constitutes the refereed proceedings of the 11th International Colloquium on Theoretical Aspects of Computing ICTAC 2014 held in Bucharest Romania in September 2014 The 25 revised full papers presented together with three invited talks were carefully reviewed and selected from 74 submissions The papers cover various topics such as automata theory and formal languages principles and semantics of programming languages theories of concurrency mobility and reconfiguration logics and their applications software architectures and their models refinement and verification relationship between software requirements models and code static and dynamic program analysis and verification software specification refinement verification and testing model checking and theorem proving models of object and component systems coordination and feature interaction integration of theories formal methods and tools for engineering computing systems service oriented architectures models and development methods models of concurrency security and mobility theories of distributed grid and cloud computing real time embedded hybrid and cyber physical systems type and category theory in computer science models for e learning and education case studies theories tools and experiments of verified systems domain specific modeling and technology examples frameworks and practical experience challenges and foundations in environmental modeling and monitoring healthcare and disaster management Formal Aspects of Component Software Kyungmin Bae,Peter Csaba Ölveczky,2018-10-06 This book constitutes the refereed proceedings from the 15th International Conference on Formal Aspects of Component Software FACS 2018 held in Pohang South Korea in October 2018 The 14 full papers presented together with an invited abstract and an invited paper were carefully reviewed and selected from 32 submissions FACS 2016 is concerned with how formal methods can be used to make component based and service oriented

software development succeed Formal methods have provided a foundation for component based software by successfully addressing challenging issues such as mathematical models for components composition and adaptation or rigorous approaches to verification deployment testing and certification   A Practical Theory of Reactive Systems R. Kurki-Suonio,2005-07-20 A man may imagine he understands something but still not understand anything in the way that he ought to Paul of Tarsus 1 Corinthians 8 2 Calling this a practical theory may require some explanation Theory and practice are often thought of as two di erent worlds governed bydi erentideals principles andlaws DavidLorgeParnas forinstance who hascontributedmuchtoourtheoreticalunderstandingofsoftwareengineering and also to sound use of theory in the practice of it likes to point out that theoretically is synonymous to not really In applied mathematics the goal is to discover useful connections between these two worlds My thesis is that in software engineering this two world view is inadequate and a more intimate interplay is required between theory and practice That is both theoretical and practical components should be integrated into a practical theory It should beclearfrom theabovethattheintended readership of this book is not theoreticians They would probably have di culties in appreciating a book on theory where the presentation does not proceed in a logical sequence from basic de nitions to theorems and mathematical proofs followed by plication examples In fact all this would not constitute what I understand by a practical theory in this context   Unifying Theories of Programming Pedro Ribeiro,Augusto Sampaio,2019-09-23 This volume contains papers presented at UTP 2019 the 7th International Symposium on Unifying Theories of Programming held in Porto Portugal on the 8th of October 2019 This edition of the UTP symposium is in honor of Sir Tony Hoare on the occasion of his 85th birthday The papers contained in this volume were invited and friendly refereed original contributions sought from the UTP community One of the papers is from the distinguished invited speaker Tony Hoare himself Nine other additional papers compose this volume covering several aspects of Unifying Theories of Programming   **Embedded Computer Systems: Architectures, Modeling, and Simulation** Timo D.
