## **Reflecting On Research Practice Issues In Health And Social Welfare:**

**Reflecting on Research Practice** Pam Shakespeare, Dorothy Atkinson, Sally French, 1993 Charts some of the hidden from view aspects of social research and explores many of the complex processes involved The chapters range from developing ideas and negotiating with funders to building research relationships and disseminating findings Observation and Its Application to Social Work Pat Le Riche, Karen Tanner, 1998 Karen Tanner and Pat Le Riche have brought together a range of contributions from practitioners and social work academics in order to discuss the application of ideas about observation to social work education and practice The authors focus on how observation can be used to counteract oppressive and dehumanising practices Do It Yourself Social Research Yoland Wadsworth, 2016-06-16 With the rapid growth of collaborative indigenous and community based research one of the key challenges researchers face is finding an effective way of involving non researchers in the research process Do It Yourself Social Research has been a best selling methodology guide for action research projects and community groups in Australia for almost three decades Always emphasizing the importance of a spirit of inquiry it demystifies the research process covering where to start how to manage a research project what methods techniques and resources to use and interpretation analysis and reporting This third edition has been thoroughly revised adding the use of narrative and dialogue in research rich research design and what digital technology can and can t contribute to the research process With its hands on no nonsense approach Do It Yourself Social Research is an essential resource for community groups college students and other novice researchers in health social welfare education and related areas Researching Disability Issues Moore, Michelle, Beazley, Sarah, Maelzer, June, 1998-03-01 This book is designed to meet a growing need for clear illustrations of how to carry out research which seeks to explore disability issues It aims to demonstrate the value of a critical attention to social rather than medical starting points for researching disability through reviewing a variety of studies which look at different aspects of disabled people s lives **Reflections On Research: The Realities Of Doing Research In The Social Sciences** Hallowell, Nina, Lawton, Julia, Gregory, Susan, 2004-10-01 By focusing upon the real life experiences of social science researchers Reflections on Research provides insight into the day to day realities of conducting research the pleasures and the pitfalls As such it is essential reading for all students and researchers in the social sciences as well as academics and professionals interested in research and research ethics **Qualitative Research Practice** Clive Seale, 2007 Aimed at the student reader this book demonstrates the benefits of using particular methods from the viewpoint of real life experience It contains chapters written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others **EBOOK: Reflections on Research: The Realities of Doing Research in the Social Sciences** Nina Hallowell, Julia Lawton, Susan Gregory, 2004-10-16 What is it really like to do social science research In what ways can research go wrong and what can you do to put it right again How do research methods and research ethics relate in practice

This is a how it went rather than a how to do research methods book. It is based upon the reflections and experiences of a wide range of established social researchers, the majority of whom undertake research in the field of health care. By drawing upon anecdotal accounts of setting up research projects, negotiating access, gathering data and disseminating findings, the book highlights the practical and ethical complexities involved in the conduct of empirically based research. By focussing upon the real life experiences of social science researchers, *Reflections on Research* provides insight into the day to day realities of conducting research, the pleasures and the pitfalls. As such, it is essential reading for all students and researchers in the social sciences as well as academics and professionals interested in research and research ethics.

*Research Methods For Nurses And The Caring Professions* Pamela Abbott, Roger Sapsford, 1998-05-16 Praise for the first edition of *Research into Practice and Research Methods for Nurses and the Caring Professions* These books provide a good introduction for the uninitiated to reading and doing research Abbott and Sapsford provide a clearly written and accessible introduction to social research One of their aims is to demystify research and in this they succeed admirably After reading the text and the articles in the reader and working through the various research exercises readers should have a clear appreciation of how to evaluate other people's research and how to begin their own David Field *Journal of Palliative Medicine* This book now substantially revised in its second edition is about the appreciation evaluation and conduct of social research Aimed at nurses social workers community workers and others in the caring professions the book is particularly focused on research which evaluates and contributes to professional practice The authors have provided many short practical exercises in the text and the examples are drawn mostly from projects carried out by one or two people rather than large research teams The clear accessible style will make this the ideal introductory text for those undertaking or studying research for the first time The book may be used in conjunction with *Research into Practice* Open University Press a reader of useful examples selected by the same authors

**The Silent Experiences of Young Bilingual Learners** Caroline Bligh, 2014-09-11 Many teachers are increasingly concerned with how to best support the learning of the rising numbers of bilingual learners in schools particularly those children who are new to English and therefore cannot yet

communicate with the teacher or their peers in their first language during the silent period This book offers an alternative insight to that which is most commonly available to teachers and researchers as instead of examining language acquisition purely from a linguistic approach it explores the learning that is occurring through a sociocultural lens and even more significantly from the young child's perspective the worm's eye view Investigated through the experiences of young bilingual learners allows the reader to make sense of the making meaning that occurs when the child cannot make sense of his/her new world nor communicate verbally in the language of instruction in the classroom Remarkably learning through the silent period is revealed as both complex and messy as the bilingual child mediates his or her own learning through a synthesis of alternative learning pathways The silent period is presented as a crucial time for learning distributed through a synthesis of close observation intense listening and most significantly copying the practices of others Throughout the silent period the children are not only seen to be learning but also contributing to the classroom practices The book not only initiates new understandings of second language learning but also offers creative ideas on how to raise the achievement of children who are learning English as an additional language

Feminist Research in Theory and Practice Gayle Letherby, 2003-02-16 an extremely welcome addition to the field of feminist research British Journal of Educational Studies This is a clear and accessible exploration of feminist method methodology and epistemology After situating herself and her work Gayle Letherby charts the debates concerned with the epistemological political and practical issues involved in doing feminist research and places the debates within a wider consideration of the status of knowledge The main focus of the book is then the particular and practical issues for feminist researchers It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production Throughout the book there is a practical emphasis on specific examples of feminist research in action and as well as summarizing current theoretical debates Gayle Letherby adds to them Feminist Research in Theory and Practice is designed and written as a textbook for students at advanced undergraduate and postgraduate level but will be a valuable resource for any researcher or individual interested in women's studies feminism and in researching in the social sciences
