Schoolishness Susan D. Blum,2024-05-15 In *Schoolishness* Susan D Blum continues her journey as an anthropologist and educator The author defines schoolishness as educational practices that emphasize packaged learning unimaginative teaching uniformity constant evaluation by others arbitrary forms predetermined time and artificial boundaries resulting in personal and educational alienation dependence and dread Drawing on critical progressive and feminist pedagogy in conversation with the anthropology of learning and building on the insights of her two previous books Blum proposes less schoolish ways of learning in ten dimensions to lessen the mismatch between learning in school and learning in the wild She asks if learning is our human superpower why is it so difficult to accomplish in school In every chapter Blum compares the fake learning of schoolishness with successful examples of authentic learning including in her own courses which she scrutinizes critically *Schoolishness* is not a pedagogical how to book but a theory based phenomenology of institutional education It has moral psychological and educational arguments against schoolishness that as Blum notes rhymes with foolishness English Journal ,1999

Teach, Reflect, Learn Pete Hall, Alisa Simeral, 2015-04-15 It's not the doing that matters; it's the thinking about the doing, said John Dewey. As a teacher, you work hard to make a positive difference in the lives of your students. But this kind of progress doesn't happen overnight, and it doesn't happen accidentally. It's the result of intentionality, planning, effort, and thought. The difference between learning a skill and being able to implement it effectively resides in your capacity to engage in deep, continuous thought about that skill. In other words, recognizing why you do something is often more important than knowing how to do it. To help you deepen your thinking and reflect on your capacity as an educator, Pete Hall and Alisa Simeral return to the Continuum of Self-Reflection, which they introduced to coaches and administrators in their best-selling *Building Teachers' Capacity for Success*, and redesign its implementation so you can take charge of your own professional growth. In these pages, you'll find tools specifically made to enhance self-reflection on professional practice, including the Continuum of Self-Reflection and the Reflective Cycle. You'll be able to assess your current self-reflective tendencies, identify opportunities to reflect on your instruction, and begin to forge a path toward continuous growth and educational excellence.

Implementing and Analyzing Performance Assessments in Teacher Education Joyce E. Many, Ruchi Bhatnagar, 2017-12-01 Teacher education has long relied on locally developed assessments that lack reliability and validity. Rigorous performance-based assessments for preservice teachers have been advanced as one possible way to ensure that all students receive instruction from a high-quality teacher. Recently, performance-based assessments have been developed which focus on the application of knowledge of teaching and learning in a classroom setting. Our book explores factors related to the implementation of teacher performance assessments in varying state and institutional contexts. The contributors, teacher educators from across the country, focus on what was learned from inquiries conducted using diverse methodologies: quantitative, qualitative, self-studies, and mixed methods. Their research encompassed faculty supervisors, cooperating teachers, and students' perceptions and concerns of teacher performance assessments; case studies of curricular reform and/or resistance; analyses of experiences and needs as a result of the adoption of such assessments; and examinations of the results of program alignment and reform. The chapters showcase experiences which occurred during high-stakes situations in implementation periods prior to high-stakes adoption and in contexts where programs adopted performance assessments as an institutional policy rather

than as a result of a state wide mandate Endorsements The chapters compiled for Implementing and Analyzing Performance Assessments in Teacher Education edited by Joyce E Many and Ruchi Bhatnagar present a thoughtful look at the challenges and solutions embedded in the adoption of teacher performance assessments for preservice teachers Most chapters feature edTPA the most commonly used performance assessment now mandated in numerous states and used voluntarily by other programs across the country and reveal how such assessments shine a bright light on the problems of practice in teacher preparation stressful timelines faculty silos communication with P 12 partners etc when new requirements disrupt the status quo Each chapter tells a valuable story of performance assessment implementation and approaches that offset compliance in favor of inquiry and educative experiences for candidates and programs alike Andrea Whittaker Ph D edTPA National Director Stanford University Graduate School of Education UL SCALE Many and Bhatnagar launch the AAPE book series with a curated volume highlighting the contexts in which teacher educators implement and utilize performance assessments in educator preparation Together the chapters present research from various viewpoints from candidates faculty university supervisors and clinical partners using diverse methodologies and approaches The volume contributes significantly to the program assessment research landscape by providing examples of how performance assessments inform preparation at the intersection of praxis and research and campus and field These chapters provide a critical foundation for teacher educators eager to leverage performance assessments to improve their programs Diana B Lys EdD Assistant Dean of Educator Preparation and Accreditation School of Education University of North Carolina at Chapel Hill
