It approaches the topic from an interdisciplinary perspective using behavioural finance as a tool to examine the occurrence of the global financial crisis and the emergence of the structural problem in large banking institutions. The book draws a comparison between the EU, the US and the UK and the relevant rules to assess the effectiveness of various approaches to regulation in a global context. Chen Chen Hu goes on to use behavioural analyses to provide new insights in evaluating the current structural reform rules in the EU. The Reform of International Economic Governance Antonio Segura Serrano, 2016-05-05

The second half of the twentieth century saw the emergence of international economic law as a major force in the international legal system. This force has been severely tested by the economic crisis of 2008. Unable to prevent the crisis, the existing legal mechanisms have struggled to react against its direst consequences. This book brings together leading experts to analyse the main causes of the crisis and the role that international economic law has played in trying to prevent it on the one hand and worsening it on the other. The work highlights the reaction and examines the tools that have been created by the international legal field to implement international cooperation in an effort to help put an end to the crisis and avoid similar events in the future. The volume brings together eminent legal academics and economists to examine key issues from the perspectives of trade law, financial law and investment law with the collective aim of reform of international economic governance.
