Shamanism and the Ancient Mind James L. Pearson, 2002 A study of archaeological evidence for Shamanism in North America and how it links to the archaeology of the mind Visit our website for sample chapters *A Cognitive Approach to Archaeology* James L. Pearson, 2000 **Handbook of Archaeological Theories** R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology **Archaeological Approaches to Shamanism** Dragoş Gheorghiu, Herman Bender, Emilia Pásztor, George Nash, 2018-04-18 This long awaited book discusses both ancient and modern shamanism demonstrating its longevity and spatial distribution The book is divided into eleven thought provoking chapters that are organised into three sections mind body nature and culture It discusses the clear associations with this sometimes little understood ritualised practice and asks what shamanism is and if tangible evidence can be extracted from a largely fragmentary archaeological record The book offers a novel portrayal of the material culture of shamanism by collating carefully selected studies by specialists from three different continents promoting a series of new perspectives on this idiosyncratic and sometimes intangible phenomenon [Archaeology: The Key Concepts](#) Colin Renfrew, Paul Bahn, 2013-09-05 From two of the best known archaeological writers in the trade this outstanding resource provides a thorough survey of the key ideas in archaeology and how they impact on archaeological thinking and method Clearly written and easy to follow Archaeology The Key Concepts collates entries written specifically by field specialists and each entry offers a definition of the term its origins and development and all the major figures involved in the area The entries include thinking about landscape archaeology of cult and religion cultural evolution concepts of time urban societies the antiquity of humankind archaeology of gender feminist archaeology experimental archaeology multiregional evolution With guides to further reading extensive cross referencing and accessibly written for even beginner students this book is a superb guide for anyone studying teaching or with any interest in this fascinating subject **Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods** David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams s previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history

when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color

The Origins of Shamanism, Spirit Beliefs, and Religiosity H. Sidky, 2017-06-21 In *The Origins of Shamanism Spirit Beliefs and Religiosity* H Sidky examines shamanism as an ancient magico religious divinatory medical and psychotherapeutic tradition found in various parts of the world Sidky uses first hand ethnographic fieldwork and scientific theoretical work in archaeology cognitive and evolutionary psychology and neurotheology to explore the origins of shamanism spirit beliefs the evolution of human consciousness and the origins of ritual behavior and religiosity

The Oxford Handbook of the Archaeology of Ritual and Religion Timothy Insoll, 2011-10-28 *The Oxford Handbook of the Archaeology of Ritual and Religion* provides a comprehensive overview by period and region of the relevant archaeological material in relation to theory methodology definition and practice Although as the title indicates the focus is upon archaeological investigations of ritual and religion by necessity ideas and evidence from other disciplines are also included among them anthropology ethnography religious studies and history The Handbook covers a global span Africa Asia Australasia Europe and the Americas and reaches from the earliest prehistory the Lower and Middle Palaeolithic to modern times In addition chapters focus upon relevant themes ranging from landscape to death from taboo to water from gender to rites of passage from ritual to fasting and feasting Written by over sixty specialists renowned in their respective fields the Handbook presents the very best in current scholarship and will serve both as a comprehensive introduction to its subject and as a stimulus to further research

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate *The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers* provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer

research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity *The Death of Prehistory* Peter R. Schmidt, Stephen A. Mrozowski, 2013-11-28 Since the eighteenth century the concept of prehistory was exported by colonialism to far parts of the globe and applied to populations lacking written records Prehistory in these settings came to represent primitive people still living in a state without civilization and its foremost index literacy Yet many societies outside the Western world had developed complex methods of history making and documentation including epic poetry and the use of physical and mental mnemonic devices Even so the deeply engrained concept of prehistory deeply entrenched in European minds up to the beginning of the twenty first century continues to deny history and historical identity to peoples throughout the world The fourteen essays by notable archaeologists of the Americas Africa Europe and Asia provide authoritative examples of how the concept of prehistory has diminished histories of other cultures outside the West and how archaeologists can reclaim more inclusive histories set within the idiom of deep histories accepting ancient pre literate histories as an integral part of the flow of human history

Wired For God? Charles Foster, 2011-12-08 Human religious experiences are remarkably uniform many can be pharmacologically induced Recent research into the neurology of religious experience has shown that when worshipping or praying a certain part of the brain apparently dormant during other activities becomes active What does all this mean for those of faith and those with none In this fascinating book barrister Charles Foster takes a survey of the evidence from shamans to medieval mystics to out of body experiences and epilepsy via Jerusalem and middle class Christianity and assesses its significance Written in short accessible chapters this is a fascinating tour of religious and mystical experiences and their relation to human physiology *Time and Complexity in Historical Ecology* William Balée, Clark L. Erickson, 2006-06-22 This collection of studies by anthropologists botanists ecologists and biologists is an important contribution to the emerging field of historical ecology The book combines cutting edge research with new perspectives to emphasize the close relationship between humans and their natural environment Contributors examine how alterations in the natural world mirror human cultures societies and languages Treating the landscape like a text these researchers decipher patterns and meaning in the Ecuadorian Andes Amazonia the desert coast of Peru and other regions in the neotropics They show how local peoples have changed the landscape over time to fit their needs by managing and modifying species diversity enhancing landscape heterogeneity and controlling ecological disturbance In turn the environment itself becomes a form of architecture rich with historical and archaeological significance *Time and Complexity in Historical Ecology* explores thousands of years of ecological history while also addressing important contemporary issues such as biodiversity and genetic variation and change Engagingly written and expertly researched this book introduces and exemplifies a unique

Sanderson, 2018-01-25 Religious Evolution and the Axial Age describes and explains the evolution of religion over the past ten millennia It shows that an overall evolutionary sequence can be observed running from the spirit and shaman dominated religions of small scale societies to the archaic religions of the ancient civilizations and then to the salvation religions of the Axial Age Stephen K Sanderson draws on ideas from new cognitive and evolutionary psychological theories as well as comparative religion anthropology history and sociology He argues that religion is a biological adaptation that evolved in order to solve a number of human problems especially those concerned with existential anxiety and ontological insecurity Much of the focus of the book is on the Axial Age the period in the second half of the first millennium BCE that marked the greatest religious transformation in world history The book demonstrates that as a result of massive increases in the scale and scope of war and large scale urbanization the problems of existential anxiety and ontological insecurity became particularly acute These changes evoked new religious needs especially for salvation and release from suffering As a result entirely new religions Zoroastrianism Judaism Christianity Hinduism Buddhism Confucianism and Daoism arose to help people cope with the demands of the new
