Shifting Ground:

Shifting Ground Naomi Scheman, 2011-04-07 This volume of essays by Naomi Scheman brings together her views on epistemic and socio political issues views that draw on a critical reading of Wittgenstein as well as on liberatory movements and theories all in the service of a fundamental reorientation of epistemology For some theorists epistemology is an essentially foundationalist and hence discredited enterprise for others particularly analytic epistemologists it remains rigorously segregated from political concerns Scheman makes a compelling case for the necessity of thinking epistemologically in fundamentally altered ways Arguing that it is an illusion of privilege to think that we can do without usable articulations of concepts such as truth reality and objectivity she maintains as in the title of one of her essays that epistemology needs to be resuscitated as an explicitly political endeavor with trustworthiness at its heart While each essay contributes to a specific conversation taken together they argue for addressing theoretical questions as they arise concretely Truth reality objectivity and other concepts that problematically rest on shifting ground are more than philosophical toys and the ground shifting these essays enact is a move away from abstruse theorizing analytic and post structuralist alike Following Wittgenstein's injunctions to just look to attend to the rough ground of everyday practices Scheman argues for finding philosophical insight in such acts of attention and in the difficulties that beset them These essays are an attempt to grasp something in particular to get a handle on a set of problems and collectively they represent a fresh model of passionate philosophical engagement

Shifting Ground Bonnie Costello, 2009-06-30 Just as the look of the American landscape has changed since the nineteenth century so has our idea of landscape Here Bonnie Costello reads six twentieth century American poets who have reflected and shaped this transformation and in the process renovated landscape by drawing new images from the natural world and creating new forms for imagining the earth and our relation to it

French on Shifting Ground Nathalie Dajko, 2020-11-24 In French on Shifting Ground Cultural and Coastal

Erosion in South Louisiana Nathalie Dajko introduces readers to the lower Lafourche Basin Louisiana where the land a language and a way of life are at risk due to climate change environmental disaster and coastal erosion Louisiana French is endangered all around the state but in the lower Lafourche Basin the shift to English is accompanied by the equally rapid disappearance of the land on which its speakers live French on Shifting Ground allows both scholars and the general public to get an overview of how rich and diverse the French language in Louisiana is and serves as a key reminder that Louisiana serves as a prime repository for Native and heritage languages ranking among the strongest preservation regions in the southern and eastern US Nathalie Dajko outlines the development of French in the region highlighting the features that make it unique in the world and including the first published comparison of the way it is spoken by the local American Indian and Cajun populations She then weaves together evidence from multiple lines of linguistic research years of extensive participant observation and personal narratives from the residents themselves to illustrate the ways in which language in this case French is as fundamental to the creation of place as is the physical landscape It is a story at once scholarly and personal the loss of the land and the concomitant loss of the language have implications for the academic community as well as for the people whose cultures and identities are literally at stake Shifting Grounds Kate Morris, 2019-03-22 Foregrounds the importance of landscape within twenty first century Indigenous art A distinctly Indigenous form of landscape representation is emerging among contemporary Indigenous artists from North America For centuries landscape painting in European art typically used representational strategies such as single point perspective to lure viewers and settlers into the territories of the old and new worlds In the twentieth century abstract expressionism transformed painting to encompass something beyond the visual world and later minimalism and the Land Art movement broadened the genre of landscape art to include sculptural forms and site specific installations In Shifting Grounds art historian Kate Morris argues that Indigenous artists are expanding and reconceptualizing the forms of the genre expressing Indigenous attitudes toward land and belonging even as they draw upon mainstream art practices The resulting works evoke all five senses from the overt sensuality of Kay WalkingStick's tactile paintings to the eerie soundscapes of Alan Michelson's videos to the immersive environments of Kent Monkman's dioramas this art resonates with a fully embodied and embedded subjectivity Shifting Grounds explores themes of presence and absence survival and vulnerability memory and commemoration and power and resistance illuminating the artists' engagement not only with land and landscape but also with the history of representation itself Shifting Grounds Ina-Maria Greverus, 2003 This 11th issue of the *Anthropological Journal on European Cultures* is dedicated to presenting ongoing and recent innovative ethnographic work on Europe Prompted by relentless social political and cultural reconfigurations on the ground the issue seeks to explore the challenges that these pose to ethnographic fundamentals In doing so it takes a broad and inclusive approach to what constitutes ethnography considering questions of theory and practice in and beyond the field and provocatively reflecting on what constitutes the field itself Fundamentals that are put

under the Spotlight in the volume are place and space history and time disciplinary relationships between ethnographic and other sites and modes of expertise and forms of representation and reception All of these as we show are in a state of movement they are all destabilised by ongoing change within the world and within anthropology itself A challenge for contemporary ethnography is to find ways of wor

Liberation Theologies on Shifting Grounds Georges de Schrijver, 1998

Besides their insistence on praxis and the application of the Word of God to a given situation Liberation Theologies make ample use of tools of analysis to uncover root causes of oppression Now it is precisely with respect to these tools that Liberation Theologies today find themselves on shifting grounds In intra ecclesiastical circles cultural concerns have come to replace socio economic analysis whereas after the implosion of the East Bloc the liberationists proper also pay more attention to the issues of gender ecology and indigenous movements The contributions to this volume originating from various continents discuss to what extent this shift in emphasis is desirable and acceptable and conclude that the cultural focus cannot possibly invalidate but only enrich and complete the socio economic analysis They moreover try to assess the developments in light of globalization economics informatics on the one hand and postmodernity on the other Given the impact of western culture politics the question arises as to whether the native cultures will succeed in keeping up their religious core values and structures of solidarity two elements so indispensable for liberative commitments

The Shifting Grounds of Race Scott Kurashige, 2010-03-15 Los Angeles has attracted intense attention as a world city characterized by multiculturalism and globalization Yet little is known about the historical transformation of a place whose leaders proudly proclaimed themselves white supremacists less than a century ago In *The Shifting Grounds of Race* Scott Kurashige highlights the role African Americans and Japanese Americans played in the social and political struggles that remade twentieth century Los Angeles Linking paradigmatic events like Japanese American internment and the Black civil rights movement Kurashige transcends the usual black white dichotomy to explore the multiethnic dimensions of segregation and integration Racism and sprawl shaped the dominant image of Los Angeles as a white city But they simultaneously fostered a shared oppositional consciousness among Black and Japanese Americans living as neighbors within diverse urban communities Kurashige demonstrates why African Americans and Japanese Americans joined forces in the battle against discrimination and why the trajectories of the two groups diverged Connecting local developments to national and international concerns he reveals how critical shifts in postwar politics were shaped by a multiracial discourse that promoted the acceptance of Japanese Americans as a model minority while binding African Americans to the social ills underlying the 1965 Watts Rebellion Multicultural Los Angeles ultimately encompassed both the new prosperity arising from transpacific commerce and the enduring problem of race and class divisions This extraordinarily ambitious book adds new depth and complexity to our understanding of the urban crisis and offers a window into America s multiethnic future
