Their commitment to recounting the stories of vessels often overshadowed in broader historical narratives hints at a deeper personal connection to maritime history which informs their passionate storytelling. The U.S. Navy Nathan Miller, 1977. The 200-year history of the U.S. Navy is told vividly here in stirring authoritative prose which is dramatized by more than 400 carefully chosen illustrations. **U.S. Navy Auxiliary Vessels** Ken W. Sayers, 2019-06-06. For more than a century the U.S. Navy's battleships, cruisers, destroyers, submarines and amphibious warfare vessels have depended on a small group of specialized auxiliary ships to provide fuel, food, ammunition, parts and other material support and services. Without these workhorse vessels the U.S. Fleet could not have won in World War II and it could not today deploy and remain on station in the far distant waters of the world. This book provides the rosters, histories, specifications and illustrations of 130 different auxiliary ship types in the last 100 years, including the little-known ones, the latest expeditionary fast transports and future towing, salvage and rescue ships. **U.S. Navy Service Craft** Ken W. Sayers, 2025-04-03. Although little known and mostly anonymous members of the Dungaree Navy are essential contributors to the operations, maintenance and readiness of the U.S. battle force. They include a variety of tugboats, barges, floating dry docks, lighters and scores of other blue-collar vessels such as range tenders, floating derricks and ferries. These behind-the-scenes workhorses of the Navy are collectively known as service craft. With more than 500 photos, this unique book provides the histories and discusses the operations and characteristics of more than 4,000 ships, boats and other craft in some 140 classifications and types that have served in the Navy as utility vessels from World War I to today. This comprehensive work includes such rare listings as drone aircraft, catapult ships, light salvage, lift craft and radiological repair barges. In addition, readers will discover a virtual flotilla of houseboats, dredges, torpedo trials craft and many other unsung ships and boats.

Long-Term Outlook for the U. S. Navy's Fleet Eric J. Labs, 2010-05. Discusses the challenges that the Navy is facing in its plans for building its future fleet. This testimony examined these matters: 1. the Navy's draft shipbuilding plan for fiscal year 2011; 2. the effect that replacing Ohio-class submarines with a new class of submarines will have on the Navy's shipbuilding program; and 3. the number of ships that may be needed to support ballistic missile defense from the sea. Before discussing those issues, the author briefly recaps an analysis of the 2009 shipbuilding plan as a point of departure for examining the draft 2011 plan. Charts and tables.
