**Extracorporeal Shock Wave Lithotripsy** C. Chaussy, 1982-10      **Extracorporeal Shock-wave Lithotripsy for Renal Stone Disease** J. S. Gravenstein, K. Peter, 1986      Shock Wave Lithotripsy James Lingeman, 2013-06-29 Extracorporeal shock wave lithotripsy ESWL arrived in the United States in February of 1984 with explosive impact in the field of urology. The first ESWL treatment in the United States with the Dornier H device occurred at the Methodist Hospital of Indiana and by the end of 1984 in spite of the rapidly the United States ESWL study group had accrued over 25 ESWL treatments accumulated experience at the six institutions involved in the FDA trial of the Dornier HM device other urologists in this country and around the world had little opportunity to gain knowledge about the utilization of this revolutionary technique. For this reason the Methodist Hospital of Indiana organized the first symposium on shock wave lithotripsy in February of 1985. Interest in this meeting was intense as approval of the Dornier device had occurred only a few weeks earlier in December of 1984. Because of the success of this initial meeting subsequent meetings have been held annually in Indianapolis. Following the third annual symposium on extracorporeal shock wave lithotripsy in March of 1987 a number of participants and attendees requested that the information presented at the meeting be made available. Therefore plans were made to publish the proceedings of the next meeting which occurred March 5 and 6 1988. The Methodist Hospital of Indiana's 4th Symposium on Shock Wave Lithotripsy State of the Art was the best attended meeting to date with over 650 registrants from 36 states and 24 countries.      *Extracorporeal Shock Wave Lithotripsy* Rolf Schmutz, Frédéric Birkhäuser, Pascal Zehnder, 2018-11-27 This book is a comprehensive guide to extracorporeal stone wave lithotripsy ESWL that includes a step by step approach for treating every possible kidney stone position. The book has an easy to read structure that will help readers understand ESWL quickly. Written by leading experts who have used ESWL to treat over 23000 patients this book brings together years of practical knowledge and expertise in one concise volume. The book aims to utilise this knowledge and allow people to independently carry out kidney stone treatment on patients. Diagrams and illustrations show the methods and techniques needed in ESWL as well as the potential complications.      Shock Wave Lithotripsy 2 James Lingeman, 2013-04-17 In the years since its development in West Germany and particularly since its arrival in the United States extracorporeal shock wave lithotripsy ESWL has become the treatment of choice for most cases of urinary lithiasis. The first shock wave lithotripsy patient in the U S was treated with a Dornier HM3 in February of 1984 at the Methodist Hospital of Indiana. In response to the great enthusiasm generated by this new treatment modality the following year the MHI presented its first symposium on shock wave lithotripsy. Each year the meeting generated more and more interest. Following the 1988 symposium the presentations were published in a book entitled Shock Wave Lithotripsy State of the Art. Following on the heels of the success of kidney stone treatment with ESWL the new field of biliary lithotripsy rapidly was gaining momentum. In response to the great interest generated by this additional application of the technology the 1989 meeting

focused special attention on this new method of treating gallstones Methodist Hospital s 5th Symposium on Shock Wave Lithotripsy which was presented in March of 1989 had the largest attendance ever with over 600 physicians from 42 states and 20 countries The publication of the proceedings of this meeting was made possible by generous educational grants from Domier Medical Systems Inc Marietta Georgia and the Methodist Hospital of Indiana The primary purpose of the publication of the proceedings of this symposium is educational Extracorporeal Shock Wave Lithotripsy C.
