Pierre-Gilles de Gennes, Francoise Brochard-Wyart, David Quere, 2013-03-20 As I glance out my window in the early morning I can see beads of droplets gracing a spider web The film of dew that has settled on the threads is unstable and breaks up spontaneously into droplets This phenomenon has implications for the treatment of textile fibers the process known as oiling glass and carbon It is no less important when applying mascara I take my morning shower The moment I step out I dry off by way of evaporation which makes me feel cold and by dewetting the process by which dry areas form spontaneously and expand on my skin As I rush into my car under a pelting rain my attention is caught by small drops stuck on my windshield I also notice larger drops rolling down and others larger still that like snails leave behind them a trail of water I ask myself what the difference is between these rolling drops and grains of sand tumbling down an incline I wonder why the smallest drops remain stuck The answers to such questions do help car manufacturers treat the surface of glass and adjust the tilt of windshields *The Physiologic Effects of Wounds* United States. Lymphatics and Lymph Circulation István Rusznyák, Mihály Földi, György Szabó, 2013-09-03 Lymphatics and Lymph Circulation Physiology and Pathology is a comprehensive account of the physiology and pathology of lymphatics and lymph circulation with emphasis on the question of lymph flow as well as the problems of capillary filtration and diffusion in the connective tissue These intricate processes are explained from a uniform point of view Comprised of 27 chapters this book begins with a discussion on the origin and architecture of the lymphatic system paying particular attention to the discovery of lymphatics and lymph circulation the phylogenesis and ontogenesis of lymphatics and general and special anatomy of the lymphatic system The second part explores the general physiology and pathology of the lymphatic system and includes chapters dealing with the role of the connective tissue in lymph formation absorption into lymph capillaries filtration and absorption through serous membranes and lymph flow and composition The remaining chapters consider the central nervous system and other organs such as the heart lung liver kidney and pancreas This monograph will be useful for students practitioners and researchers in physiology and pathology Blood Program in World War II Douglas Blair Kendrick, 1989

United States Naval Medical Bulletin, 1943 **Histamine and Anti-Histaminics**, 2013-11-27 It was an agreeable though strenuous task to edit a book with so many distinguished contributors on a subject to which I have given half of my life In 1959 when Prof O EICHLER invited me to edit a book on Histamine and Anti histaminics as a supplement to HEFFTER S Handbuch I thought the task could be done in three years Now five years are gone and only half is fulfilled Though so far as

the Histamine part of the book is concerned the initial plan has been followed very closely we had to leave the Anti histaminics for another volume of unpredictable dimensions In 1924 eight pages inserted in a Chapter on M utterkorn by ARTHUR R CUSHING were considered enough in vol II Part II pg 1319 1326 of the Handbuch Now 922 pages did not suffice to cover all the aspects of the subject Especially in the last few years the subject has expanded in so many directions that the antihistaminic part had to be excluded from the present volume Possibly another thousand pages will be necessary to cover what remains of the subject In planning the book we made great use of the excellent and classical mono graph by W FELDBERG and E SCHILF on Histamin published by Julius Springer in 1930 Army Medical Bulletin U.S. Army Medical Dept, United States.
