The Sudden Star Pamela Sargent, 2014-04-01 From a Nebula award winning author society turns to violence after a strange celestial body appears in the sky in this dystopian sci fi thriller When what appears to be a star turns its powerful and deadly glare toward earth the entire planet becomes a living nightmare Rape murder and suicide become the norm and fear grips at the heart of humankind One doctor goes against the tide defying the medical code by providing insulin to a diabetic But a protocol that was once a routine part of his practice turns Dr Simon Negron into a criminal With a young prostitute as his only ally he goes on the run through a world that grows madder with every waking hour Published in the UK under the title *The White Death*

Homesmind Pamela Sargent, 2014-04-01 Anra is a solitary She was born without the power to mindspeak and unlike her fellows she cannot communicate in unspoken thoughts In the past she would have been killed at birth but the arrival of the Wanderer the comet controlled by the cybernetic intelligence known as the Homesmind has changed everything The people of the comet the skydwellers now supply solitaires with implants that allow artificial mindspeaking The solitaires are sequestered in a single village that is willing to care for such children Anra and her new brethren were thought to be the possible bridge between the people of Earth and the

skydwellers but the gap may be too great since the people of Earth consider solitaires an abomination and the skydwellers as soulless. The solitaires are instead outcasts in two worlds part of each but fully accepted in neither. Another comet enters the system refusing to communicate with Homestead and speaking to the people of Earth with the voices of their own dead seducing them into a submission of their individual wills and trying to lure them to oblivion. Anra and her fellow solitaires have the power to resist their call but can they unite in time to save everyone else Cloned Lives Pamela

Sargent, 2014-04-01 This debut sci fi novel by the Nebula and Locus Award winning author of *The Shore of Women* follows five human clones in an unforgiving world. Shock and outrage greet Paul Swenson's announcement of the success of his latest and most controversial scientific endeavor. Having taken advantage of a brief lull in legislative restrictions the renowned astrophysicist and a team of bioscientists have created five human clones four males and one female from Swenson's own genetic material. From the moment Michael Edward Albert James and Kira Swenson are revealed to the world they are viewed with hostility and suspicion. Growing up under the heavy yoke of specialness the five exceptional human experiments have no one but each other to turn to for emotional support. Then tragedy strikes and everything falls apart. Now Kira and her brothers must follow their destinies down separate divergent paths. Heading out into a world that never welcomed them each clone is intent on pursuing knowledge career family all the desired elements of a so called normal life. But they cannot escape their shared past because the true purpose behind Paul Swenson's remarkable achievement remains shrouded in shadow. And his children are prepared to travel to the ends of the Earth and beyond for an answer to the question that has always haunted them: Why were we made? **Puss in D.C. and Other Stories** Pamela Sargent, 2015-07-10 Pamela Sargent's latest

collection assembles 10 of her recent stories including *Puss in D.C.*, *Strawberry Birdies* and *A Smaller Government* showing why she's one of the most popular authors currently writing science fiction today. From the introduction by Eleanor Arnason Sargent has a quality usually associated with hard SF a certain kind of intellectual rigor. With her it carries through all of her work. She thinks things through. Notice when you read this collection how many different kinds of stories are here and notice the range of moods the stories go from really funny to really dark with a lot in between. I also want to mention Sargent's persistence. Writing is a hard life. Many good woman writers I admired in the 1970s 80s and 90s have vanished. They stopped writing or stopped trying to sell their fiction or changed their names and moved to writing romance gay romance generic fantasy whatever they could sell. In one way or another they were silenced. Sargent has kept doing thoughtful serious fiction dealing with the issues that interested her. **The Cambridge Companion to American Science Fiction** Eric Carl

Link, Gerry Canavan, 2015-01-26 This Companion explores the relationship between the ideas and themes of American science fiction and their roots in the American cultural experience. Her Voices Fabio B. Dasilva, Mathew J. Kanjiranthinkal, 1996 *Her Voices* is a compilation of intriguing studies that explore some of the key issues and understandings that have become focal points of feminist discourse in recent times. This work examines subordination marginalization and even the outright

suppression of Her voices by the linguistic philosophical and other symbolic structures of a patriarchal and phallographic society
