

Introduction to Economic Growth

Development of Modern Growth Theory

Questions -

1. Why are some people (countries) rich and some poor?
Need to find determinants of GDP and growth rates to answer this
2. Why do some countries grow faster than others?
3. In long-run, is growth rate exogenous or endogenous?

Endogenous Variable - Determined by decisions (usually based on optimizing behavior; e.g., maximize utility leads to demand; maximize profit leads to supply); (2) something you can change through policy (e.g., tax will change P_D , P_S , and Q)

Supply & Demand - $P_D = a - bQ$ and $P_S = c + dQ$; this leads to $P_D = P_S = a - bQ = c + dQ$
 $\Rightarrow Q = (a - c)/(d + b)$ $\therefore Q$ is given (endogenous)

Growth Rate - can policies affect growth rate (i.e., is growth rate endogenous)?
neoclassical theory says yes, but only in transition, not in long-run; some newer theories say yes; others say no

Technology - technical description; production function; intuitive: instructions for how to produce things

Rice Example - cooking rice requires a pot and heat source (capital), rice and water (resources), and a recipe with directions on how to cook it (technology)

Steady State Equilibrium - also called long-run equilibrium; all variables grow at a constant rates (could be different from each other, but constant over [or independent of] time)

Brief History -

Adam Smith - focused on accumulation of capital

Carl Marx - focused on technological change and unemployment

Ricardo - focused on class structure

Neoclassical Growth Theory - Solow (1956); assumptions:

- Perfect competition in all markets
- Exogenous rate of population growth (in long-run)
- Exogenous rate of technological change (in long-run)
- Endogenous income per capita levels
- Endogenous transitional growth rates

Example - look at income per capita (y); we can change the growth rate (dy/dt) in transition, but not in the long-run (i.e., slope stays the same)

New Growth Theory - Romer (1986) & Lucas (1988); also called **endogenous growth** theory because now long-run growth rate can change; dropped perfect competition assumption and made technical change endogenous

Schumpeterian Approach to Economic Growth - new products have short lifetimes (all companies from the original Dow Industrial list are gone except General Electric); firms enjoy temporary monopoly power (imperfect competition) then are replaced (creative destruction); all used fixed population (not realistic) because introducing any population growth means economic growth unlimited (also not realistic)

Grossman & Helpman (1991), Aghion & Howitt (1992), Segerstrom, et. al. (1990) - focused on product quality

Romer (1990) - focused on product variety

Contemporary Challenges for Caribbean Economies Terence M. Yhip, Brian Alagheband, 2024-09-30 The COVID 19 pandemic laid bare economic weaknesses throughout the Caribbean region and humane standards of living are at risk This book highlights the retooling that must be done to promote economic stability in this important area of the world It contributes to ongoing discourse regarding Caribbean economies and highlights the long term economic challenges that must be addressed to move forward In this book economists Terence M Yhip and Brian Alagheband offer ideas and proposals to reinvigorate economic growth through the adoption of technology and investment in human capital The book explains how to diversify economies by increasing the complexity of exports With a shift in priorities nations will need to raise total factor productivity and potential output The book offers strategies to diversify the production and export of complex goods and services The authors note that the necessary capabilities can take nations decades to build Such investment will require trade offs and sacrifice Progress cannot and will not be immediate but such modifications will produce meaningful economic returns Contemporary Challenges for Caribbean Economies includes a chapter on the oil

future for Guyana a rising economic superstar due to the nation's oil riches that portend either blessing or curse It also includes a chapter written by Tawfik Ramtoolah about the impressive dynamism of the Mauritius economy which transformed from sugar cane monoculture to industrial and financial services diversification Applied Economics in Globalised Economies James Foreman-Peck, Peng Zhou, 2025-07-29 Globalisation the increasing integration of markets and ideas across borders throughout the world has redefined how economies function how societies interact and how nations confront shared challenges Recognising these profound transformations this book attempts to bridge the divide between economics and economics as well as the gap between theories and policies Complete with case studies lecture slides test questions and sample data codes the book is an engaging resource for upper undergraduates and postgraduate economics students alike

Rethinking Economic Development, Growth, and Institutions Jaime Ros, 2013-09 Presents the contributions that early development theory can make to growth economics in answering why some countries are richer than others and why some economies grow faster than others *EU Competition Law and the Information and Communication Technology Network Industries* Andrej Fatur, 2012-03-08 Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation However recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context This is especially important in the field of information and communication technology ICT network industries where competition centres on network effects innovation and intellectual property rights and where the key driver of consumer benefit is technological progress Consequently when an antitrust intervention is contemplated a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area such as non price predatory practices tying and bundling co operative standard setting platform joint ventures and co operative R D

Advanced Macroeconomics Filipe R. Campante, Federico Sturzenegger, Andrés Velasco, 2021-10-11 Macroeconomic policy is one of the most important policy domains and the tools of macroeconomics are among the most valuable for policy makers Yet there has been up to now a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced At the same time doctoral level textbooks are usually not targeted at a policy audience making advanced macroeconomics less accessible to current and aspiring practitioners This book born out of the Masters course the authors taught for many years at the Harvard Kennedy School fills this gap It introduces the tools of dynamic optimization in the context of economic growth and then applies them to a wide range of policy questions ranging from pensions consumption investment and finance to the most recent

developments in fiscal and monetary policy It does so with the requisite rigor but also with a light touch and an unyielding focus on their application to policy making as befits the authors own practical experience Advanced Macroeconomics An Easy Guide is bound to become a great resource for graduate and advanced undergraduate students and practitioners alike

Bridging the Gap Between Growth Theory and Policy in Asia: An Extension of the Solow Growth Model Singh, Rup, 2014-03-31

Although economic growth is amongst the oldest of debates in Economics there has been little advancement in growth theory

since the classic works of Solow As such clear cut answers to the context specific determinants of growth especially for developing countries are rare Bridging the Gap Between Growth Theory and Policy in Asia An Extension of the Solow Growth Model adds to the works of Solow by showing how his original model can be extended and used for policy discussing issues in growth econometrics including the theoretical underpinnings of growth models and some of the important challenges in empirical studies on economic growth This simpler manual will be highly useful for applied economists policy makers and graduate students

Rethinking Economic Growth Theory From a Biophysical Perspective Blair Fix,2014-12-09

Neoclassical growth theory is the dominant perspective for explaining economic growth At its core are four implicit assumptions 1 economic output can become decoupled from energy consumption 2 economic distribution is unrelated to growth 3 large institutions are not important for growth and 4 labor force structure is not important for growth Drawing on a wide range of data from the economic history of the United States this book tests the validity of these assumptions and finds no empirical support Instead connections are found between the growth in energy consumption and such disparate phenomena as economic redistribution corporate employment concentration and changing labor force structure The integration of energy into an economic growth model has the potential to offer insight into the future effects of fossil fuel depletion on key macroeconomic indicators which is already manifested in stalled or diminished growth and escalating debt in many national economies This book argues for an alternative biophysical perspective to the study of growth and presents a set of stylized facts that such an approach must successfully explain Aspects of biophysical analysis are combined with differential monetary analysis to arrive at a unique empirical methodology for investigating the elements and dependencies of the economic growth process

Public Capital, Growth and Welfare Pierre-Richard Agénor,2013 Laying a solid foundation of economic facts and ideas this book provides a comprehensive look at the critical role of public capital in development
